MOD Musical
By Dominic G. Zippilli

MOD Musical uses a program called MODPlay for Windows. This document describes MODPlays interface and usage.

MODPlay is a German product and is therefore programmed in German. (Note: MODPlay <u>IS</u> shareware.) There is no need to use the "Datei" menu. MOD Musical automatically loads the files. Pattern and Von: Pattern is the current pattern, and Von is the total amount of patterns. Fast-Forward or Rewind the music by using the arrows on the bar or by dragging the button. The repeat button turns on or off the repeat function. The default is off. Under the menu, the second selection "Einstellungen", is the setup option. This lets you decide which driver you want MODPlay to use, and frequencies, stereo on/off, etc.
