

Angela's Cat Count

Description:

Angela's Cat Count is a Windows MultiMedia Application written in Visual Basic 2.0. The program is written for children ages 3 to 6 to help them learn to count. The program uses Windows compatible wave files which may easily be changed to suit the user.

Requirements:

- 1) Windows 3.X with MultiMedia Extensions
- 2) A Wave Audio Compatible sound card properly installed under Windows
- 3) VBRUN200.DLL Visual Basic Dynamic Link Library - available on most BBS's
- 4) MCI.VBX Visual Basic MultiMedia DLL in the Windows\System directory - supplied with this program
- 5) Various Wave files supplied with this program
- 6) CATCOUNT.EXE properly installed

Installation:

- 1) Copy CATCOUNT.EXE into the directory of your choice.
- 2) Copy all the wave files supplied with the program into the same directory. The program looks for these wave files in the directory that it loads CATCOUNT.EXE from.
- 3) Copy MCI.VBX into your Windows\system directory so that Windows can find it.
- 4) Make sure you have a copy of VBRUN200.DLL in your Windows\system directory.
- 5) Install CATCOUNT.EXE in the program group of your choice under Program Manager per your Windows Manual.
- 6) Start the program by double clicking on the cat icon. After a short greeting the program will ask your child to enter a number from 1 to 20. After the child enters an appropriate number the program then proceeds to count and display cat faces as it counts. This exercise is helpful for small children to learn their basic digits and to learn how to count.
- 7) To Stop the program click on the Stop Sign or Close the Form. There may be a slight delay until the program is done talking.
- 8) You may record your own voice for use with the program. Make sure that you name your wave file recording the same as those supplied with the program. The Program uses standard Windows Wave files, such as those produced by the Sound Recorder supplied with Windows 3.1.

Liability Statement:

I have tested this program to the best of my ability, however, due to this vast differences in computer hardware, I can not guarantee that it will work on your computer. Therefore, I accept no liability for any damages which may be associated with the use of this program on your computer

Distribution:
