Registering Windows UnArchive via CompuServe

There is now a quick and easy way for CompuServe users to register Windows UnArchive. CompuServe is providing a Shareware Registration Service, whereby the user can register online and have the registration fee charged to his/her CompuServe account. Registration is a little more expensive this way ($12 instead of $10), but it has the advantage of ridding you of that annoyware screen within 48 hours.

If you wish to register online follow this easy procedure:

Type "GO SWREG" at any CompuServe "!" prompt.
From the next menu, choose "Register Shareware".
From the next menu, choose "File Name"
When you are prompted for the filename, type "WUNA22.ZIP"
Answer "yes" when it asks if you want to register.

After all this, CompuServe will send me a mail message to indicate that you have registered, and I will send your registration number to you via CompuServe mail within 48 hours.

Since CompuServe users can allways get the latest version of Windows UnArchive in the Windows Advanced Forum (GO WINADV) there is no option to get a disk with the latest version via CompuServe.
