The Latest OS/2 Files

About Windows OnLine™, (the BBS)

Modem Specials

ABOUT THE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition *is published weekly courtesy of the* **Windows OnLine™**

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

**Windows OnLine
Box 1614
Danville, CA 94526-6614**

(Voice 510-736-4376)

Enjoy!

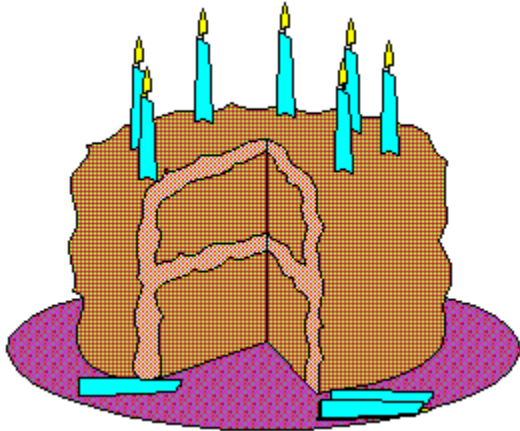

WINONLINE.INI

Welcome to the
WinOnLine™ Review™
SHAREWARE EDITION

Happy 10th Issue!

The **WinOnLine Review™ Shareware Edition** brings you its tenth issue this week! Wolly is very happy with the great response he's gotten from so many readers who appreciate the weekly news of the latest files! Many of you across the country and the world have been calling **Windows OnLine (BBS)** as a result of the new magazine, and we are always happy to make your acquaintance. Leave Wolly a message and tell him how you feel about WOLRS.

And than they were 17

Windows OnLine has expanded this past week to 17 phone lines/nodes to better serve our membership. With this added capacity we also wish to accommodate the increasing number of readers of our magazines who are visiting the BBS. Why not ***Call WOL today and download all the files you see in this issue. You'll be glad you did!***

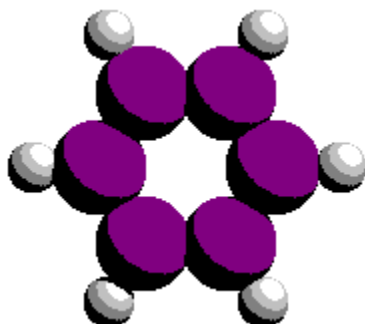

Enjoy!

CHEMICAL

Computerized Chemistry Set complete with Bunsen Burner

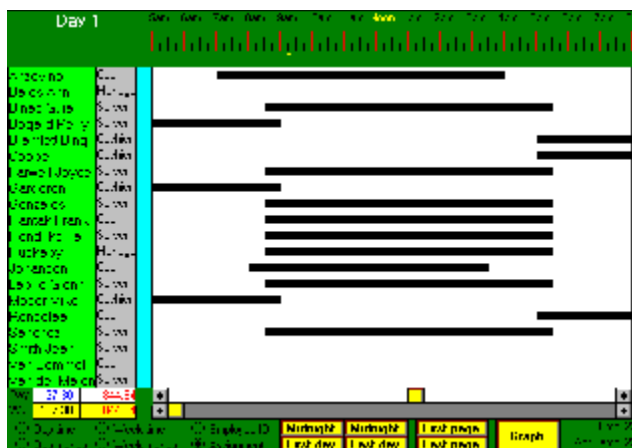

Chemical for Windows goes a lot farther than Wolly's high school chem class ever did! It is a **molecular modeling program** that enables you to select atoms from the periodic table and combine them. You can manipulate your models in various ways, bonding elements and breaking the bonds. **Animate the display**, or select colors and shadowing criteria to produce a high quality graphic that can be copied to the clipboard for use elsewhere..

This is a very sophisticated program with lots of bells and whistles and abilities whose significance and purpose Wolly fails to comprehend. Perhaps Wolly should spend some time with the tutorial provided as a separate help file. **WINCHEM.ZIP** (111K) may be registered for **\$20.00**. The source code is also available.

SCHEDULE EMPLOYEES

If you must, this is a great way to do it!

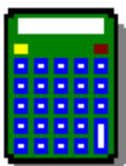

But Mr. Holmes! How can I schedule all these squid-flippers at our 24-hour FastFood SquidBurger Stand? And how much will it cost me if I double-staff during the lunch rush? And

who's who? I can't remember if Joe is a server or a busboy, or if Sally is a hostess or a cook? Elementary, my dear Watson. Just download **SEW101.ZIP** (142K) from my favorite BBS, **Windows OnLine**. Schedule Employees for Windows will give you a **visual picture of the way it all fits together in 24 hour segments using time bars**. You can show each employee's function, clock number, times, pay, and more. Graph the duty roster, print schedules, why, this program will do everything but yell at them when they show up late, and it's only **\$39.50** to register! Now, quit babbling and bring on one of those yummy squid tartare sandwiches, Dr.!

BUSINESS CALCULATOR

A calculator for all seasons

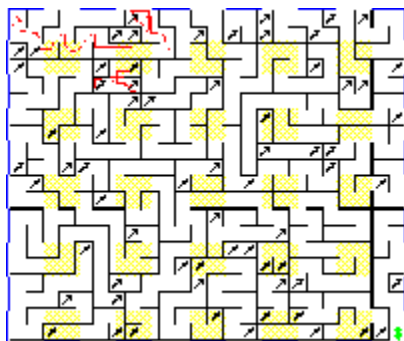

Calculators in various shapes, sizes and forms seem to be another favorite of Windows shareware programmers. Business Calculator is one with an innocuous name that does go a bit further than the usual. True, its boring screen image does resemble an HP calculator with a glandular condition, though it can also be configured to a slightly more compressed look. In any case, the image is covered in keys with cryptic semi-acronyms that only a handful of CPAs understand.

However, instructions are rendered in the form of a thorough help file, and over a dozen more **common uses are in easy to use screens** available from the menus. Financial, retail and memory registers (on screen formats for ease of use) can be used and displayed, and an on screen "tape" is also available. **BCALC21.ZIP** (234K) goes beyond its ordinary name to provide a great deal of present and future value for its **\$25** shareware fee.

MAZEMAKER

a-Mazing, and on a daily basis

You have to be a big fan of mazes or be willing to overdo it with Mazemaker. This incredible little program will **toss a maze at you to start each day** (before coffee!?!) or whenever you feel

so inclined. You not only lose your way through a normal maze, you get multi-level mazes where you must jump from level to level. There are other options available, so you'd better download **MAZEMAKR.ZIP** (84K) if you want to wander about aimlessly bouncing off walls. Registration is \$15

TRUE TYPE FONTS

This week's scribe fodder

DOLPHIAN **DOLPHIAN.ZIP (50K)**

ECCENTRICAL **ECCENTRI.ZIP (31K)**

LIGHT & BLACK **LBLACK.ZIP (24K)**

All fonts samples are shown with their names in upper and lower case input from the keyboard. The results speak to their capabilities and characteristics.

MSTAPPS

Seven in one, or perhaps, one in seven???

MS-TupperWare (who, if they ever become well-known will be the recipient of a letter from some high-priced lawyers) presents **seven "applets" in one**. The installation of the compressed files is neatly, though indiscriminately done. There is no description of the functions of any program until all seven programs have been installed, complete with program group, on your drive. However, Mr. Tupper is thoughtful enough to provide a listing of the files and their locations so you can find and delete them if desired. There is no help file assistance, only descriptions and instructions within the doc file. Wolly tried each and will attempt to limit his comments to a sentence per:

FONTVIEW: GPF Alert -- too many fonts on Wolly's system or what??

FILEVIEW: A useless utility that lists a files size, date/time and attributes (isn't file manager free?) Didn't completely terminate, later froze up and required the three-finger salute to kill, untimely it also caused a GPF that ate Wolly's mouse.

DISKGRAPH: Choked on drive D with a "bad file name" but then displayed a nice 3-D pie graph of drive C for a second and then popped up an "invalid path" box and terminated. Options are available, but the failure rate discouraged Wolly.

IMAGEVIEW: Display many graphic formats singly or in the form of a slide show with definable delay times. Nice.

MST-DIALER: Create names/company/number/notes in a database and dial away.

MST-TIMER: Specify from the pretty interface the hours, minutes and seconds; the system sound will play and a box appears when the time is up.

MST-CLOCK: A little bar with the day, date and time on it.

The GPFs were caused by the same DLL which, according to the documentation, is used by *all* MST applications. Based on that fact, Wolly feels certain the machine or file are not at fault. **!MST-APPS.ZIP** (633K) makes a good case for being a bunch of utilities for only **\$10**. However, sometimes grabbing the first issue of a shareware package is akin to buying a car in its first year out, downright risky. Wolly sees MSTAPPS as mostly MISHAPS at present.

PRACTICAL PHONE BOOK

And it is

A well named program. Wolly has been looking for a simple **phone directory/dialer** for a bit, and perhaps Practical Phone Book will get a chance at the Wolly stamp of approval. The interface is very direct and context sensitive help is available at the click of your right mouse button. Entries are easy to add, and include name, number, home/work indicator, and notes. Search abilities to locate name, number and notes are included, although bizarre. Criteria is only good if it's the first name or piece of information listed, and note searches resulted in strange selections if there was no match. **PPBK11.ZIP (53K)** will dial a Hayes-compatible modem on COM 1 through 4, and may be registered for **\$10**.

DRAGON CREATOR

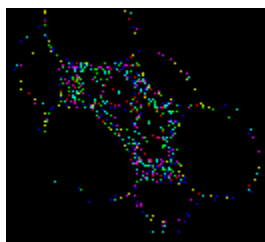

Yeah, okay, so . . .

Wolly is not sure why the program is included here, but perhaps to solve a puzzle. This dragon creation program is alleged to have a purpose in fantasy role-playing games. A matrix of dragon criteria including the creature's color and bad breath is randomly presented and can be modified. Yes, it can print, too. The author requests **\$10** for **DRAGONC.ZIP**. Wolly requests an explanation. Perhaps Wolly's paws are too firmly placed on the earth, but he remains clueless. The fact that dragon leaves tracks even after terminated (remains in the task list) makes it even more messy.

MARTIN FRACTALS

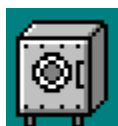

Screen Saver

You may enjoy this **freeware** screensaver. Stick it in your Windows directory along with a couple DLLs and let it do its thing. **MARTIN10.ZIP** (36K) is often dazzling, and always pretty neat to look at.

WINLOCK

Paws off!

Wolly knows many people who lock their PCs when they leave the office, and use screen savers with passwords to try to protect themselves during the day. It's a sad fact of life that there are data vandals out there who take delight in destroying hours of hard work, sometimes inadvertently. Winlock is an attempt to keep out the bad guys.

Essentially, it's a **screen blanker** which activates at your request or after a user-specified time. Once blank, any activity causes a request for the password. **Violations are met with a flashing red screen** and WAV "alarm". However, over and above the features of a password protected screen saver is the fact that Winlock will also "protect" you at boot by requiring a password. Of course, anyone with a bootable disk renders this exercise a moot point. Nonetheless, **AWINLOCK.ZIP** (62K) is available for **\$19**. Wolly is not certain its minimal protection is really worthwhile.

HOME ACCOUNTANT

You have one living with you, too?

No, it's not Quicken on the cheap. It is, however, a respectable piece of software that can help to organize your financial life. Set up accounts representing your bank accounts, credit cards and

cash (what cash?). Process payments, deposits, transfers, etc. against those accounts. Track your expenses, keep a budget and be warned when you exceed your goals. Overly complicated it's not. The interface is clean and pretty. The program very understandable. Useful reports can be generated, picturing just how much financial hot water you're in. **HOMEAC23.ZIP** (242K) is a very reasonable \$15 shareware product. It's usefulness will depend upon your self discipline and the extent to which you want to keep records and control your spending.

Happy Sharewaring!

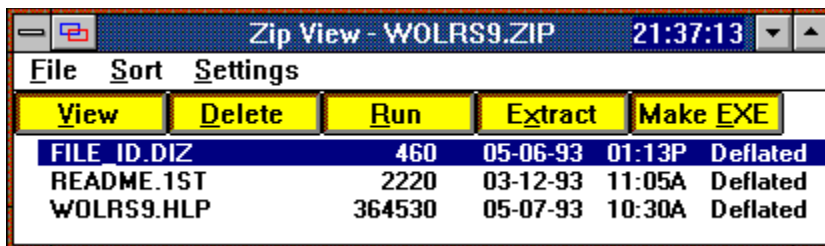

Wolly's Secret Weapons

PART ONE of some more

The fact the Wolly is not human certainly is a significant help with the superhuman task of preparing the weekly **Shareware Briefs** column. Also significant is the shareware and commercial tools Wolly uses to help him get the job done. Maybe some of his secret weapons will be useful to you with the tasks you need to perform.

Wolly downloads tons of files each week and decides on the dozen or so to review. First, I've got to look inside that ZIP. Wolly isn't foolish enough to fool with a DOS command line, so he uses a shell unzipper he thinks beats all: **Drag and Zip!**

Drag and Zip has two basic sides to it; we'll talk about one side first. ZipView is the handiest of them all, according to Wolly. During installation it sets itself up as the association program for zip files, so you double click on any zip and, voila: it shows you the guts:

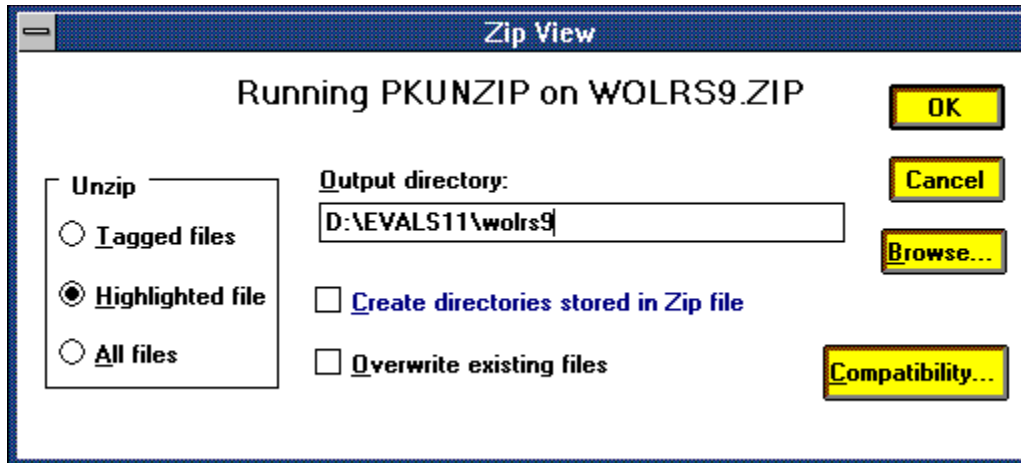

By the way, here's a tip: If you don't have "1ST" and "ME" set up as associations to Notepad, you ought to.

ZipView makes it a snap to preview the insides of a program. Double-click on the README.TXT file and it will temporarily unzip into Notepad, so Wolly can get an idea of what's what before he goes all the way.

Wolly also keeps all his **Windows OnLine Review** and the **WOLR Shareware Edition** magazines in zip form. With ZipView it's simple to look into the zip and double-click to view the magazine without ever taking up additional disk space!

Once Wolly decides to audition a program for WOLRS, he'll continue on and choose "extract" from the ZipView menu. Now he gets a convenient screen to specify his unzipping preferences. ZipView will even create the directory if you want when you specify a destination that doesn't exist.

Wolly can view, peruse, and unzip his candidates very quickly and efficiently, thanks to ZipView from Dan Baumbach's (Canyon Software) Drag and Zip.

I shouldn't shortchange the other side of the coin. Drag and Zip is named for the piece that Wolly uses on the other end of the equation. When all is done and it's time to zip up the result. Drag and Zip quietly sits as an icon, waiting for you to gather your content from the file manager and drag them to it. Then it's time for more choices to make a zipfile to your satisfaction.

Wolly couldn't do his job without Drag and Zip, **DRAGZP18.ZIP**, a shareware bargain at **\$25.00**. The latest version of PKZip is handled with aplomb. There are a lot of other real goodies within both ZipView and Drag and Zip, so check it out!

Another dragger that Wolly uses constantly is **Draggin' Viewer**. Authors seem to like to fill their files with odd filenames, like: README.NOW, NEWPROG.REG and README.2ND, with all sorts of weird extensions. It's a definite drag to open Notepad and trudge through directory after subdirectory to load this oddity. Draggin' Viewer waits as an icon to which you can drag that weirdo! If the file is too big for Notepad, it's automatically loaded into Write for conversion. Very handy!

Wolly likes to use Draggin' Viewer to gander at the odd capture files with date extensions that his data communications software leaves in its wake, like WINONLIN.413. DW100S.ZIP is only \$5.00.

That's two of Wolly's faves. More to follow!

THE LATEST WINDOWS FILES

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

WINDOWS - NEW UPLOADS from May 2, 1993 through May 8, 1993

(older files omitted)

(File Name - Byte Size - BBS Date - File Description) (Comments in **RED**)

- _!MSTAPPS.ZIP 632858 05-02-93 MSTApps 1.0 for Windows. A collection of **seven Windows applets** which include an image viewer, disk charter, font viewer, timer, clock, attribute viewer, and phone book. ***REQUIRES VBRUN200.DLL*** (Last Revised: 04/18/93)

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

OS/2 THE LATEST OS/2 FILES

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

OS/2 - NEW UPLOADS from May 2, 1993 through May 8, 1993

The following directory contains all new DOS files to WOL

148.	DOS	- NEW UPLOADS	480
			<hr/>
67,688,012			
			<hr/>
(SubTotals)			17,186
<hr/>			
1,879,677,163			
			<hr/>
Totals			26,511
<hr/>			
2,919,330,626			

This listing is as of March 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings **THE BEST AND LATEST FILES**

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and MORE FILES - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:
