Your weekly guide to what's new in the world of shareware

About Windows OnLine™, (the BBS)

Modem Specials

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features,* such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware,** with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition
is published weekly courtesy of
Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

Windows OnLine
Box 1614
Danville, CA 94526-6614

(Voice 510-736-4376)

Enjoy!

Wolly

Welcome to the
WinOnLine™ Review™
SHAREWARE EDITION

TRUETYPE BONANZA!

Fontophiles will be in their glory this week! **EIGHTEEN font files** came into **Windows OnLine** this week, most of which are shown in Shareware Briefs. Take a look and grab those which provoke your eyes. Wolly hardly remembers anything from RUNE 101 when he took Dead Earth Languages at the *Universal Institute*, but if you're acquainted with any Germanic peoples of the 9th Century and are behind in your letter writing, FUTHARK.ZIP may be just what you're looking for.

TRUETYPE USERS

Chances are that if you are a truetype font user, you must dance about the keyboard liberally. **WinOnLine Review™** and the **Shareware Edition** are in need of a few good writers. If you enjoy checking out shareware and telling your friends about your finds, make thousands of new friends and spread your experiences through the **WinOnLine Review™ Shareware Edition** and/or the **WinOnLine Review™**. You needn't be a Stephen King, Rembrandt or an accomplished coder of Help files. Leave a message for Wolly or Publisher Frank Mahaney on **Windows OnLine™** (BBS) 1-510-736-8343 or give Frank a call at 1-510-736-4376 and join the club!

BUSY WOLLY!

Shareware Briefs is not so brief this week, as Wolly was busy with **fourteen mini-reviews** for your enjoyment this week. *Also busy* is **Windows OnLine™** (BBS), now with seventeen nodes! Give us a call and check out the "Home of the Wolly". No other BBS can make such a claim! (*nor would they want to?- Ed.*)
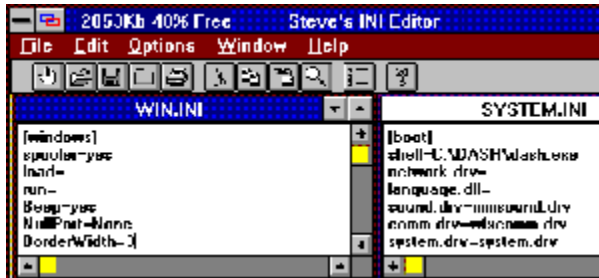

Enjoy!

Wolly

STEVE'S INI EDITOR
Good stuff from a member of the WOL family

All nepotism aside, this is a great little program! Wolly initially was skeptical about any specific program to edit INI files, thinking *"what's Notepad for, then?"*. Just a quick glance at the program answered the question. Steve's INI Editor will **automatically open your four favorite INI files** when you start the program, ready and waiting to be edited. Pushbutton controls put file and edit options at your fingertips. A sensible feature is the **automatic backup of a changed INI** with an EDT extension which can help restore your application to pre-oops! condition. Halfway through the look-see, Wolly realized that the author was our very own **Steve Peschka** who contributes such wonderful stuff to the **WinOnLine Review™**. **INIEDI.ZIP** (26K) is only **$5.00** to register. Steve, you owe Wolly one pepperoni pizza for the plug, despite the fact that it was well deserved.

SKULL SCAN
Hello, is there anybody in there?

EEEEEEEEYYYYYYUUUUUUU! Is this what the inside of you humans' heads looks like? Author Rolf Mathison offers this **freeware** look into the human skull allegedly using either a CAT or MRI viewpoint. View the fifteen skull slices one at a time, all at once, or animate them. **SCULSCN.ZIP** (311K) is fun for the whole family!

TRUE TYPE FONTS
Printing Plethora

Bodony (italic) **BODONY.ZIP (41K)** actually italic

Get the whole family: **BODONYB.ZIP (45K) BODONYBI.ZIP (48K) BODONYI.ZIP (38K)**

Coopa Blacka **COOPABL.ZIP (50K)**

Dom Very Casual **DOMVCAS.ZIP (48K)**

Goudi Oldstyle **GOUD.ZIP (52K)**

And more: **GOUDIB.ZIP (52K) GOUDII.ZIP (55K)**

Goudy Handfooled **GOUDIHAN.ZIP (69K)**

JENNIFER THIN **JENNIFER.ZIP (19K)**

Marker Fine Point **MFFINE.ZIP (33K)**

Marker Felt Thin **MFTHIN.ZIP (32K)**

Marker Felt Wide **MFWIDE.ZIP (32K)**

Old Englishe **OLDEENGL.ZIP (55K)**

Times Romaine **TIMESB.ZIP (45K)**

ᚠᚢᚦᚨᚱᚲ **FUTHARK**   **FUTHARK.ZIP (17K)***

ᚱᚢᚾᛁᚲ   **RUNIC**   **FUTHARK.ZIP (17K)***

All fonts are displayed at 18 points with their names in upper and lower case; the resulting view is subject to the basic wonderfulness of video reproduction and character sets available. *Runic and Futhark are both within FUTHARK.ZIP.

# FONT PRINTER
And a great deal more . . .

If you are a fan of our weekly TrueType updates, you probably also have the problem of trying to keep a handle on who's who and what's what in your collection. Font Printer does a great deal **more than just print your fonts**, providing strong facilities for **viewing and mapping characters** to the keyboard. The illustration shows the keyboard layout function: clicking on one of the keys on the shifted or unshifted illustration enlarges the character from 2X to 10X its displayed size for easy review (as shown) and indicates the normal keyboard location. A similar feature is available when displaying the extended character set matrix.

Font Printer can use its default character set or your **custom text to print samples** of selected fonts. Fonts are selected by moving them from the left listing to the right, but Wolly could find no way to select multiple fonts at a time or print a full inventory listing of all fonts. One annoyance was the delay while fonts were "loaded" at the time the program is begun and again each time the three special functions are used for the first time each session. Several long seconds went by as Wolly's current 249 font collection was shown sliding up the display graph. Unavoidable, perhaps? The **button bar provides easy selection of most functions** and access to the special keyboard, extended character set and font display routines. Is Font Printer different than some of the other utilities out there? *Yes and no.* If you've already bought one, you'll not see anything really special enough to warrant a change. However, if you're still in the market I would urge you to check out **FONTPRT2.ZIP** (122K) which is **fully featured and considered by Wolly a shareware bargain** at **$15.00.**

DRAGGER
Another tool for the disabled Windows user
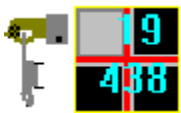

Here's another program from George Leotti, the author of SoftKeyboard, a program for the disabled we wrote about in an earlier issue of **WOLRS**. Dragger provides another **helping hand to those with disabilities** who can manipulate a mouse but **who cannot perform a drag and/or double click of the left button**. The resident icon is broken into four parts, with the lower right accessing help. Click once on the upper left, move to the file or object you want to drag and click on it once. Now you can drag it, without holding the button down, to your target, releasing it with another click of mouse. The upper right quadrant, once clicked, causes your next single click of the mouse to perform as a double click. The final section turns the right

mouse button on and off. Keep in mind that the "mouse" referred to could be any sort of pointing device (pen, trackball, etc.) that acts like a mouse. **DRAGGER.ZIP** (16K) can be registered for **$15.00**.

BLOCK BREAKER
What next, Pong Returns?
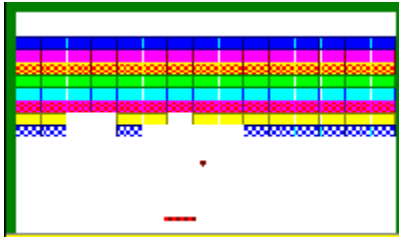

Blockbreaker is a retread of an old game that is lost in the past, as perhaps it should be. This version does add some variety in terms of additional block patterns and a few other options, but I suspect the basic game is a bit of a bore to most. To top it off, the editor which enables editing the blocks and creating your own patterns is crippled along with a couple of other features. **BLC301.ZIP** (34K) must be registered for **$10.00** to obtain the key to those touches. Fine, I guess, if you're nostalgic for the extremely uncomplicated and repetitive.

WINVELOPE
Now that Cliff's gone, who delivers the mail?
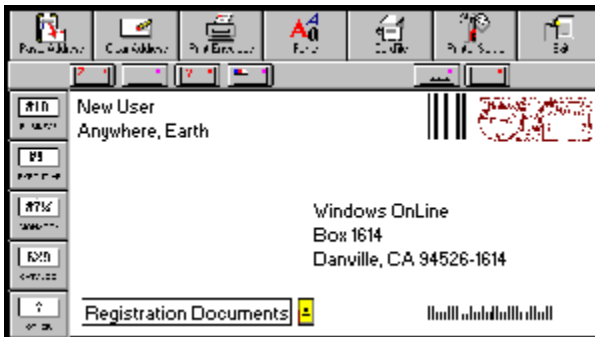

Unless you deal strictly with E-Mail, which is doubtful, you probably have need for Snailmail on occasion. Rather than grabbing the nearest crayola and tackily schmearing out an envelope, show your class (or at least be a pretender) and try Winvelope. It's fairly obvious what goes where and how when using this program. Pushbuttons make access to the various functions easy and include the PIM and barcode to speed delivery of your dispatch. Each of the five components on the envelope can be repositioned to your taste. Mail merges can be performed, but only from Cardfile format files. Altogether, it puts out a nice result that can even use a graphic BMP as the return address. Register **WNVEL42.ZIP** (120K) for **$20.00**.

DT SEARCH
Find *anything*

Heavy duty is the only way to begin to describe DT Search. The price tag is heavy duty, too, at **$99.00** a pop, but you do get **a flock of features**. The program can search and display documents in a number of formats including AmiPro, ASCII, DOS Text, RTF, MSWord for DOS to 5.5, WinWord to 2.0, WP4.2 to 5.1, WP/Win 5.1 & 5.2, Wordstar 2000 and through version 6, Multimate 4 and MSWorks. And the way it does it is super slick. **Specify directories through a visual tree** of your drive and let it loose to look for combinations of words, words near words, fuzzy searches with wild cards and more. Pieces found can be pasted. DT Search will also create indices to make searches nearly instantaneous.

There's a lot more to DT Search, and I suggest you check out **DTSW.ZIP** (344K) to see all the bells and whistles if this taste agrees with your palate and checkbook. A DOS version is also available for $99.00, or $149.00 for both.

TRIVIAL APPLICATION
moronware
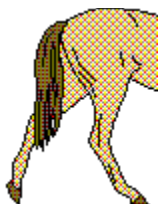

Wolly likes a good joke. This *is **not*** one. **TRIVIAL.ZIP** (16K) is **stupidware**, a "program" that blows up into an EXE that produces a box that does nothing but provide a "most trivial imaginable program" help dialog and a 1105280 byte data file that repeats "Highly Compressible data distributed with trivial.exe" (sic) ad nauseam. Wolly wouldn't be so critical if it had a shred of cleverness, cuteness, redeeming social value or even proper syntax. You will not find this alleged "program" on WOL, as it has been suitably zapped. Wolly has provided an illustration representative of the uncreative author, who was so proud of the cleverness of his creation that he neglected to claim it.

RPM GAUGE
Don't redline Windows, either!
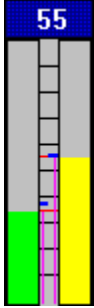

When your resources get low, Windows becomes a lot more fragile and unpredictable. RPM Gauge is a **floating resource gauge** which graphically **indicates User and GDI resources** in use. These two resource pools are important to monitor because they are fixed in size and used by all Windows apps. The bars change color from green to yellow to red, as more resources are used, like a tachometer in a car. The author states that it will sound an alarm and even terminate itself when resources fall dangerously low. Wolly opened a ton of applications on a four megabyte system but nothing happened even as he exceeded 90%. The system didn't crash, but Wolly didn't feel very secure going any further to tempt disaster. **RGAUGE11.ZIP** (8K) is **freeware**, though the author states that if you really like it he'd be pleased to receive a donation of $1-5.

ALFRED
Butler from Down Under

Alfred is a simple little **freeware** program that reclines as an icon at your beck and call. An ALT-TAB will wake him and an ALT-SPACE (or click of the mouse) will bring him forward with a configurable menu from which you can choose to bring another application or batch file to life. If you find **ALFRED.ZIP** (11K) effective, make it something to write home about and drop the author a postcard.

WINDOW MANAGER
I suppose it is
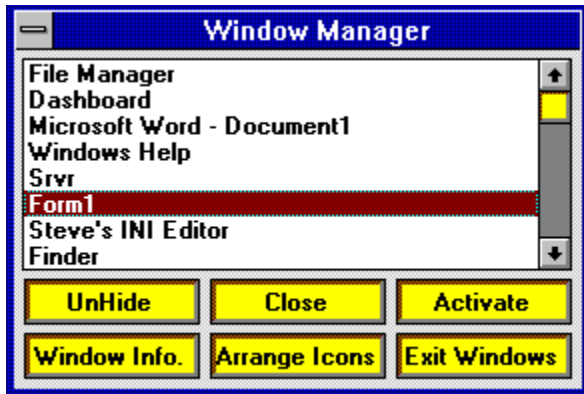

Window Manager is another **task manager replacement**, but instead of managing tasks, Window Manager **manages your windows**. Tasks can have multiple windows, but Task Manager won't let you close just one window. Window Manager will. You can also exit and restart windows, or reboot the whole system from the program. If you find this capability more significant than Wolly does, grab **WINMAN.ZIP** (22K) and pay the man **$10.00**.

TEXT MANAGER
New Notepad

Textman is a Notepad replacement which will open multiple text files in multiple windows, making cutting and pasting a bit less cumbersome. A button bar is provided to make it even easier. **TEXTMAN.ZIP** (65K) is **$10.00**.

THE TIME IS
Now even my *computer* bugs me about being late!

Wolly is still not entirely certain whether computers are like children: they should be seen and not heard. The Time Is presents a **talking clock**, at least it says it is (pun intended) in the documentation files. Apparently the sound files enabling its speech are not a part of the shareware version. Alarms with a variety of sound files are, however, and worked well on Wolly's PC Speaker. The clock can **announce the time on demand or on the hour if you wish**. I wished I could have heard it, but **TTI2E.ZIP** is only **$13.95** if you do. A special deal is available if you own any other registered clock.

Share your favorite shareware with your friends!

**Wolly**

but don't forget to register!

Mega Edit 2.07

I often wonder if Microsoft deliberately created some of the utility programs within Windows just to make sure that a substantial shareware market would develop. One program that I find particularly annoying is NOTEPAD. This program lacks a range of features I would think are elementary to a text editor. Two limitations of this program that I find most awkward are the default *.TXT file extension and file size limitations. When opening a file in NOTEPAD the only files listed in the dialog box are those with a TXT extension. Sure, you can simply click on the List Files of Type box to change the default from *.txt to *.*, but I find this extra step annoying.

Likewise, when opening a file, even one with a TXT extension, you sometimes encounter the Error message:

Notepad

The E:\WINDOW\NAMES.TXT file is too large for Notepad.

Use another editor to edit the file.

OK
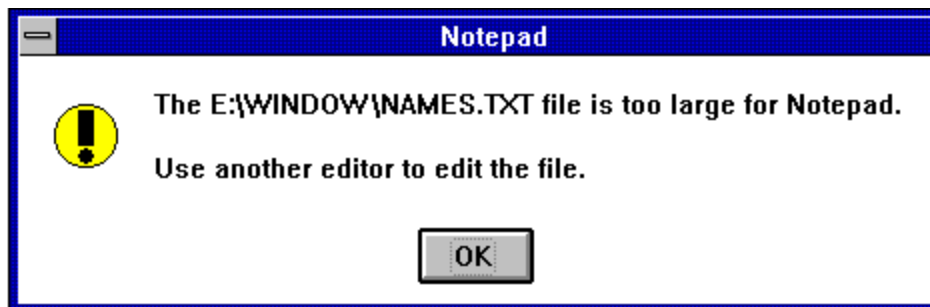

when the file is larger than NOTEPAD can handle. I think NOTEPAD is the first text editor I've found that has a file size limitation as small as it does. Now, I realize that this program is a very basic and simple editor, and I know it isn't made to be a word processor like Windows Write. But I do believe that more features could have been added to the basic program to make it a bit more useful. So, having reached my limits with NOTEPAD, I started looking around for a replacement program that could do more. Believe me I found there is no shortage of text editors for Windows. After looking at about 6 - 8 programs I found *MegaEdit*. My first impression of the program was Ho-Hum. But *MegaEdit* got my attention by first solving the two problems I listed above. I thought any program that can take care of my objections that fast deserves a closer look. After getting into the program I found *MegaEdit* to be both adaptable and quite powerful.
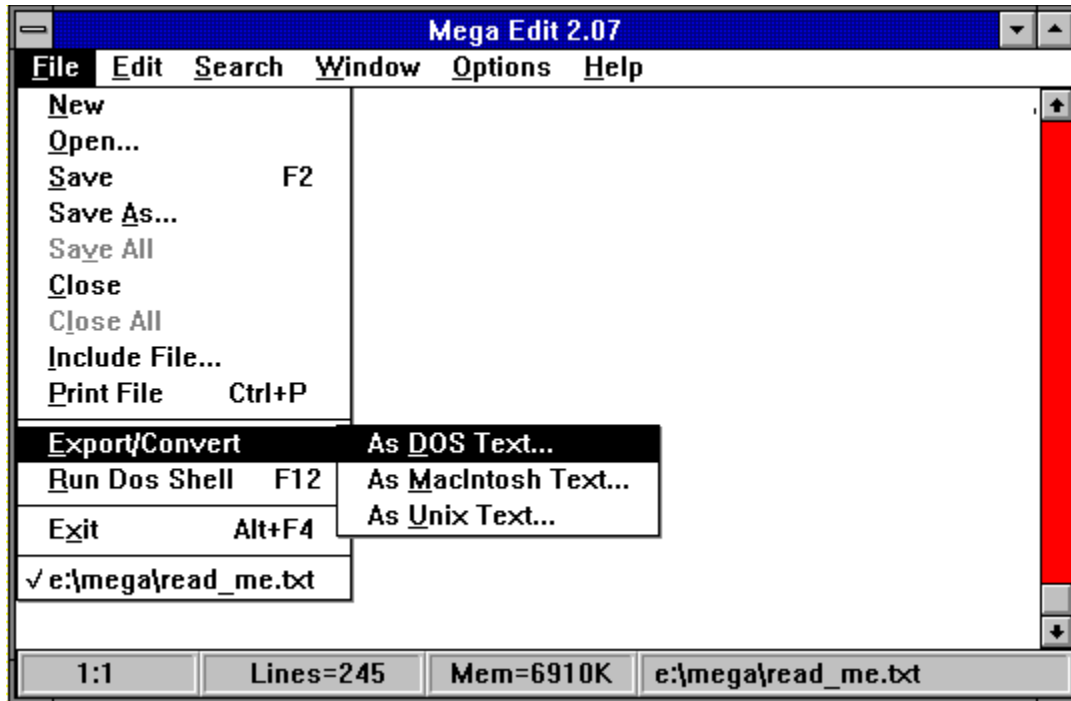

The **MegaEdit** program opens any file type, including text files, Windows files, C files, Pascal files, and Basic files. It will also import/export/or convert text files between DOS text, MacIntosh text, and Unix text. The program also has enhanced search features to allow you to look for not only case sensitive text but for whole words as well. So, no more looking for "at" and stopping at every other word in the document, like that or attention. If you want only the complete word, that's all you get. There is also a Goto Line option that allows you to specify exactly where you want to go in your document. This option prompts you for a number and offers the choice of going to that specific line, or to that percentage of the document. So, for example, if you type in 50, you have the choice of going to line #50 or 50% through the document.

Another useful feature of the **MegaEdit** program is its split screen option. Here you're offered the options to Split Window, UnSplit Window, or Switch Pane. This feature is quite useful when editing two documents at the same time. Simply open a document and click on Split Window. The document appears in both the top and bottom panes. You can then save one, or both under different names and edit one while the original is right where you can see it. No more wondering if you've made the correct changes. You can make your comparison right away.

The program also has options for word wrap, tab settings, program colors and alternate fonts. There is also a *.BAK option that you can set under the preference to automatically create a backup file with a *.BAK extension.

All in all, **MegaEdit** is a first rate replacement for the NOTEPAD program. So, if you find that the NOTEPAD program is more a hindrance than a help to you, take a look at the **MegaEdit** program. You will not be disappointed. Members of Windows OnLine can find **MegaEdit** as MEDIT207.ZIP in Directory #19 - (WINDOWS-Editors/WP Utils).

The following directory contains all new DOS files to WOL

148.	DOS - NEW UPLOADS	480	67,688,012
	(SubTotals)	**17,186**	**1,879,677,163**
	Totals	**26,511**	**2,919,330,626**

This listing is as of March 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings
THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions
THE LATEST FILES and **MORE FILES** - we get them EVERY DAY!
MINIMAL DUPES - we clear off the old when we bring on the new
EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:
