## Modem Specials

## ABOUT THE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

**Windows Shareware Briefs** - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

**New Files** - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

**Feature Reviews** - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

## The WinOnLine™ Review™ Shareware Edition

## Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

**Windows OnLine**  
**Box 1614**  
**Danville, CA 94526-6614**

**(Voice 510-736-4376)**

**Enjoy!**

Wally

# WINONLINE.INI

## A WEEK OFF!

Don't look for Wolly next week! And don't look for the **WinOnLine Review Shareware Edition**. It won't be there.

I WANT MY

# WOLRS!

**DON'T PANIC!** (as I heard once while hitchhiking around the galaxy). Wolly now gets a week to rest his sore paws when Issue 75 of the giant **WinOnLine Review** comes out! If you've never seen the original publication that spawned WOLRS, are you in for a treat. Click on the logo below to see some of the content of last month's issue.

Good stuff, eh? Wolly even gets to reprint a few of his faves in each issue. Grab **WOLR75.ZIP** next week. Enjoy this issue. And I'll see you in Issue 15 of WOLRS first week of July.

Enjoy!

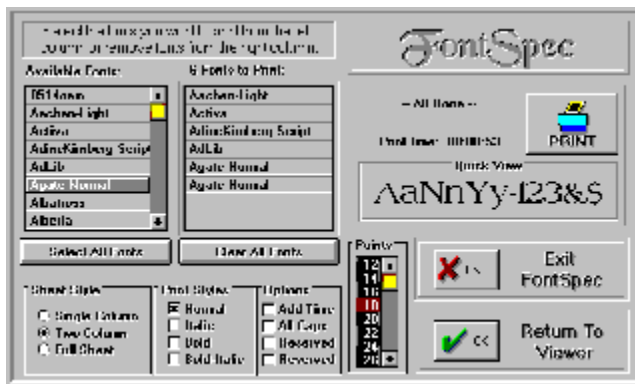

## FONT SPEC

The cure for fontitis

There are only a few good font management/cataloging programs. Now there is one more. Font Spec brings a **sharp 3-D looking interface with clean and fast font viewing**. The sample printing seemed faster to Wolly than past experiences with other programs, though no benchmarks were done. The viewscreen in the main program window can display your selection in sizes from 6 to 98 points, in regular, italic, bold or bold italic. Five samples can be selected, including sample text, character set, a paragraph, and two which are user-defined.

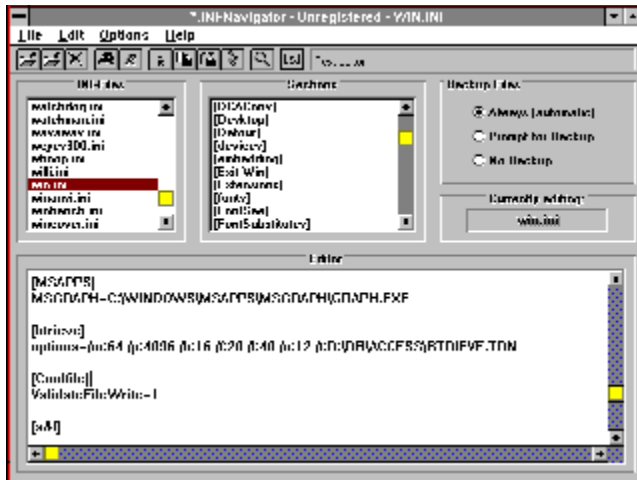

The font metrics are displayed using the labeled pushbutton, adjacent to the printer icon which takes you to the font printing module. Sample sheets are available in single, dual column, or full sheet. All are positioned to allow a left margin for notebook holes and are **very attractive, dated, page numbered, and allow for custom headers and footers**. Font sample size is selectable, and you can choose to print fonts in any or all of regular, bold, italic and bold italic variations if they are available. All in all **FNTSPC32.ZIP** (98K) is a **very professional looking and performing** program which can be registered for a very reasonable **\$19.00**.

## INI NAVIGATOR

Don't give up the ship!

INI files can be the heart of a Windows program. Ini Navigator may be just the heart surgeon you're looking for.

The program is **very well thought out**. When you select an INI file in the top left display, the section headings are displayed to the right in alphabetical order. This makes modifications a snap; click on your chosen heading and the detail of that area of the file appears in the edit box below. The options wisely allow you to choose to make **automatic backups** of files you change. Pushbuttons provide quick access to most functions including **restore and undo** features. **ININAV.ZIP** is a very well thought out approach to INI maintenance and can be registered for only **\$15.00**.

## TRUE TYPE FONTS

If one told you something you didn't know, would it be a font of information?

**AT\_aken**     **ATAKEN.ZIP (35K)**

**AVERROIANE**     **AVERTT.ZIP (17K)**

**Bookplate**     **BOOKPL.ZIP (28K)**

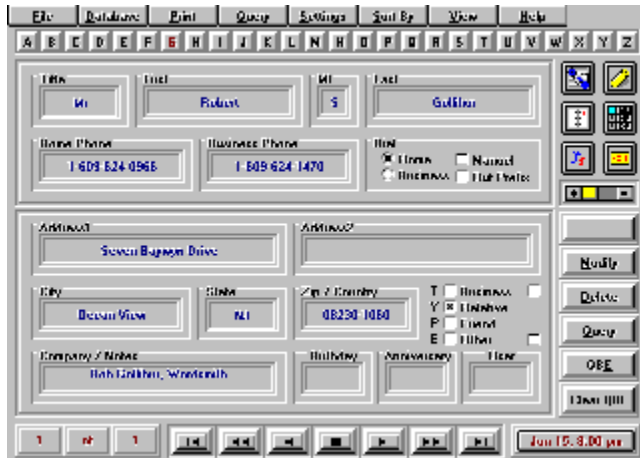

**Bucephalus**     **BUCETT.ZIP (20K)**

*Common Script*     **COMSC2.ZIP (43K)**

## WIN PIM 3D

GL = Great Looking

Wolly reviewed a video database program from GL Software in a prior issue of WOLRS. Author Gene Lucio specializes in **3-D look databases**, and Win Pim is no exception. Unfortunately, this is a **demo program** which only allows for modification of the **five records** included for exercise purposes. The program is very pretty and has some nice features, most of what you might expect from a **Personal Information Manager**: Dialer, beautiful pop-up appointment calendar, full font choice and color selections, limited reports (and limited mostly to dot-matrix output), Query by Example, and even a **doodle pad** to bring up while you're on the phone. Start-up of the program will bring any reminders to your immediate attention. The alphabetical rolodex-type keys allow retrieval of the records with great ease. **WINPIM1.ZIP** (396K) deserves some attention if you're in the market, though I suppose I'd get bored trying to give it sufficient exercise being allowed only five records with which to play. Be warned, also, that the program is very **resource-hungry**. It bombed on Wolly's 4 meg 386-25 and slurped up much of his 16 meg 486-33's available stuff (love that technical talk, don't you?). Perhaps the reasonable **\$15.00** registration will encourage you to give it an audition.

## WIN FUEL

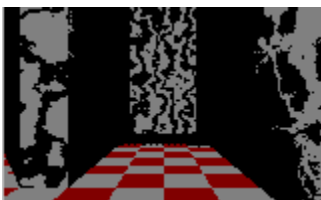

There's no fuel like an old fuel.

<b>Quantity</b>	
<input type="text" value="9.85"/>	<input type="radio"/> Liters <input type="radio"/> Imperial Gallons <input checked="" type="radio"/> US Gallons
<b>Distance</b>	
<input type="text" value="293.2"/>	<input type="radio"/> Kilometers <input checked="" type="radio"/> Miles
If you need Some Help, Press F1	
<b>Calculation Results</b>	
39.10 mpg (Imperial) 32.56 mpg (US) 13.83 kpl 07.23 Liters Per 100 km	
© 1993, Donald L. Schulz	

Wolly hates to be critical (well, perhaps -- perhaps not), but this pretty little program will allow you to input the gallons, liters or imperial gallons used at fill-up and the miles or kilometers traveled since your last fill-up. **Voila!** Your miles per gallon, along with other useless conversion figures (kilometers per liter, miles per imperial gallon) are shown. ALL THIS for the low shareware fee of \$15.00. Golly gee wow! Interested? Wolly's gonna tell you a secret: if you enter your miles traveled into your \$3.99 calculator and then press the divide key, then enter your gallons at fill-up and press the equals key --- VOILA! Your miles per gallon. Or, you could use **WFUEL12.ZIP** (90K). Now, tell the person who set up your computer for you that you're done, and, please, please, stay away from gasoline.

## LOST IN A LABYRINTH 256

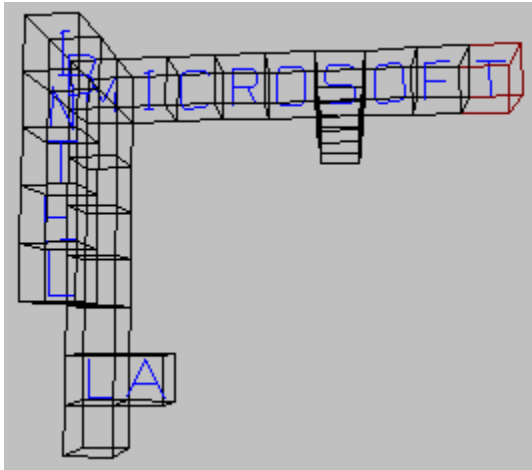

No David Bowie in this one

This labyrinth gives you a **rat's-eye-view** of the maze from within. All images are 256 color ray-traced art to produce realistic viewpoints and perspectives (*you'll have to excuse the 16 color version displayed --- the 256 color version is much smoother and dimensional*). The objective is simple --- escape! You are in the maze, and located somewhere else is the door out. Find it and you're free. Look carefully, the door can only be seen when you are right up next to it. **LIL20.ZIP** (207K) is only a **demo** version with one level. The registration fee of **\$20.00** will bring you all ten levels in which to be lost.

## CYBERSPACE CROSSWORD PUZZLE

It's a whole new world in there --- stake your claim!

Most bizarre (but then isn't "cyberspace"?). Included with the three-dimensional crossword puzzle is the "Cyberspace Cruiser" engine which allows maneuverability in that world. A click allows you to move one CLU (cyberspace linear unit). The point goes beyond crossword puzzles and involves storage of data. Wolly tried to do the crossword puzzle, but lost it in cyberspace. The crossword puzzle is **freeware** (if you can find it), but pieces of cyberspace cost money (\$40). Wolly read the explanation and got a headache. But it sounded pretty neat. Download **3DXWD21.ZIP** (65K) and you read all about it! Then please leave Wolly a message and explain it to him.

## LOCATOR

Easier than finding a file in a diskstack!

Few of us have the hard drive size necessary to keep *everything* at hand. Wolly, himself, has to deep-six most of the programs he reviews, storing only those which might require future reference on floppy disk and other storage media. Locator will **keep track of the locale of files on your archived floppies and other removable storage devices** (SyQuest drives, Bernoulli Boxes, flopticals, opticals) **in a rather elegant fashion**. The interface isn't pretty, but effective. Locator scans the drive you've specified and **creates a database of files**, including catalog name and disk ID (each user defined), file name, date/time, file attributes and size. Descriptions or keywords are not supported. The file finding mechanism includes alpha pushbuttons and is very efficient and effective in its search. Check out **LOCATOR.ZIP** (92K), which can be registered for **\$19.95**.

## ERIC'S AMAZING DFALL/WIN

isn't

Drive	Total	Used	Free
C:	244,334,304	210,731,776 (94%)	33,602,528 (6%)
D:	210,546,688	205,578,240 (98%)	4,968,448 (2%)
E:	2,091,008	485,376 (23%)	1,605,632 (77%)

See Wolly look at his total space, used and available on his drives? See Wolly view the 26 bits of information about his computer (Oh! I'm using DOS 5.0 and have 640kB base memory!!!). All in a box of words. See Wolly send **\$5.00** to register **DFALLW11.ZIP** (121K). No, I didn't see that last one, either.

## COMPUTER VENDOR & PRODUCTS DATABASE

You have that much software!?!

First, if you're not running higher than 640x480, forget it. Don't click on the "About" option, 'cause the "OK" will run right off the bottom of your screen! cBase, as it refers to itself, is a **relational database of vendors and products**. You may keep track of the software you own and who owns the company (could be a moving target). Make comments, specify **contacts and support phone numbers**, copy and paste names/addresses to other applications, add products. Searches are supported. cBase seems a bit weak at this point in its life. Printed output is not up to par, with uneven results. If you have so much software that you need a database to keep track of it, perhaps one of those products is a database program?? **CBASE158.ZIP** (33K) is a hefty **\$35.00** for registration. Consider also that this is the sixth version (1.51 through 1.58) the author has issued in the last six months since original release.

by

as told to Bob Gollihur

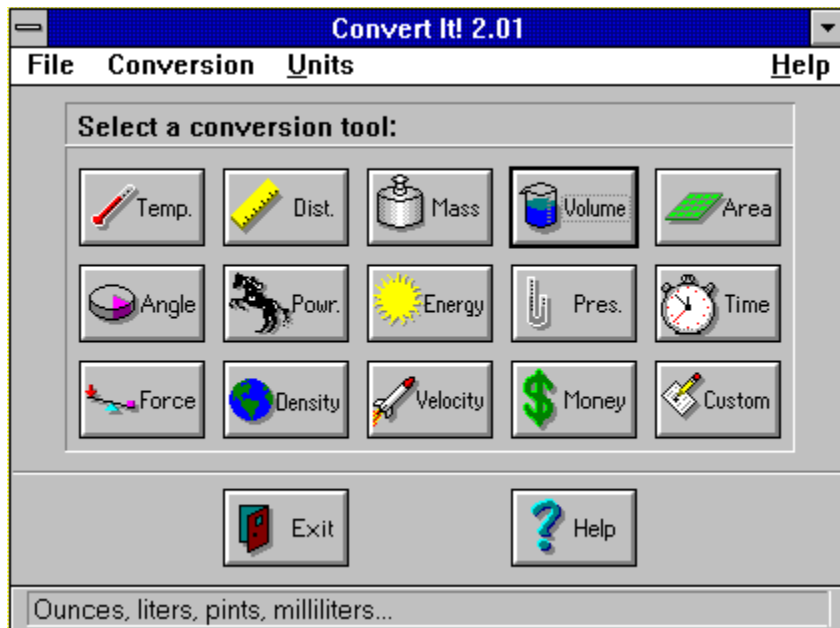

## *Convert It! 2.01*

When was the last time you needed to find a specific value and you didn't have a conversion table. For example, let's assume you wanted to make your favorite world famous chili recipe for a neighborhood block party for 240 people. If your recipe served 4 people and called for one teaspoon of salt, how much salt should you add for your big batch? You could divide 240 by 4 and get 60 teaspoons. You could then get a chair and carefully add 60 teaspoons of salt to your pot. Or you could simply find how many teaspoons are in a cup and use this larger measurement to add the salt. By the way, using the *Convert It!* program, the answer to this problem is 1.25 cups.

No matter what your application, be it for business or pleasure, we all need to convert between different units of measurement almost on a daily basis. The simplest way to perform a majority of these calculations is with the *Convert It!* program. We reviewed an earlier version of this program several months ago, but the new version 2.01 is such a significant upgrade that it's almost a completely new program.

*Convert It!* is a program that is both quite easy to use and includes virtually all the conversions almost anyone will require. The program menu offers fifteen different categories of useful conversion tools. These conversions are grouped into the more common categories such as temperature, distance, mass, volume, and area. In addition, some of the less common conversions for angles, power, energy, pressure, and time are also included. New to this version are the conversions for force, density, velocity, money, and a custom category.

This version of *Convert It!* adds a range of significant new features to the program. The program now allows you to add, delete, change, or modify the conversion factors and conversion units. Several new categories have been added and there is even a *Custom conversion* category that you can setup and use for your own particular types of conversions, assuming of course you cannot find one of the predefined conversions that will suit your needs. With the scope of coverage the program offers, I think you'll be hard pressed to find something they left out. But, for example, should you wish to convert something like miles per hour to furlongs per fortnight, the Custom conversion category will fit the bill nicely. The *Convert It!* program also works well with other Windows programs and answers obtained in this program may be copied to any other program through the clipboard.

The program has an excellent on-line help system and tutorial to help you through some of the more complex as well as the simple conversions. Likewise, the instructions for changing the existing values and for creating custom conversions are also well done and easy to follow. The program also shows the formulas and methods used to make all the conversions. *Convert It! 2.01* is a utility program that is well worth the registration fee. Members of Windows OnLine can find *Convert It! 2.01* as CV201.ZIP in Directory #35 - (Windows-Accessories A-G).

*Convert It! 2.01* (Registration fee: \$10.00, [\$5.00 for upgrades from earlier versions])

## THE LATEST WINDOWS FILES

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

### WINDOWS - NEW UPLOADS from June 6, 1993 through June 12, 1993

(older files omitted)

(File Name - Byte Size - BBS Date - File Description) (Comments in **RED**)

- 3DXWD121.ZIP 64680 06-12-93 **Cyberspace Crossword Puzzle/Cruiser** v1.21: three dimensional crossword puzzle for MSWindows; req. VBRUN200.DLL; 03/09/93.
- 4NT10D.ZIP 44296 06-12-93 **4DOS/NT patches** to update rev A, B, or C to rev D. ONLY USEFUL if you already have 4DOS/NT 1.0 rev A, B, or C (use VER /R to check what rev you have). Not needed by new 4DOS/NT users. Also requires JP Software PATCH.EXE (in 4DPATCH.ZIP). (Last Revised: 06/01/93)
- ACSTRASH.ZIP 137550 06-12-93 **ACSTrash** v1.00 for Windows 3.1 - Swiss "poubelle" program w/ Drag & Drop. In French! (Last Revised: 05/29/93)
- ATAKEN.ZIP 34532 06-06-93 **ATAKen TrueType** font with 450 kerning pairs. (Last Revised: 05/01/93)
- AVEROI.ZIP 21448 06-06-93 **Averoigne Postscript Adobe** font is an unusual display font w/large, formal letters in which the serifs have been expanded into large, sweeping curls and ornaments; great for titles or as alternative capitals w/any serif text typeface; w/AFM/CFG/INF/PFB/PFM. (Last Revised: 05/09/93)
- AVERTT.ZIP 16607 06-06-93 **AveroigneRegular TrueType** font is an unusual display font w/large, formal letters in which the serifs have been expanded into large, sweeping curls and ornaments; great for titles or as alternative capitals w/any serif text typeface. (Last Revised: 05/09/93)

***Notice:***

*Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.*

*It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.*

*Thank You.*

## OS/2 THE LATEST OS/2 FILES

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

### OS/2 - NEW UPLOADS from June 6, 1993 through June 12, 1993

<b>2,919,330,626</b>			

*This listing is as of March 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!*

# **Windows OnLine™ brings**

## **THE BEST AND LATEST FILES**

**NO JUNK** - we obtain the files ourselves, screen them thoroughly and edit their descriptions

**THE LATEST FILES and MORE FILES** - we get them EVERY DAY!

**MINIMAL DUPES** - we clear off the old when we bring on the new

**EVIDENCE:** Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

**NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:**
