Adobe Illustrator™ Self-running Demonstration Program

System Requirements
Requires Windows 3.1

This demo was optimized to run in 256 colors at 640x480 resolution. You can run the demo at higher resolutions, but it will be displayed in a 640x480 window in the upper left corner of your screen. You may also run the demo in other Windows supported video modes, but you may experience performance problems if your display is set for more than 256 colors. This is a limitation of the Macromedia Windows Player.

Demo Operation
To install the demo, follow the installation instructions printed on the disk label. Once the demo is running, click the left mouse button to return to the main menu. To quit the demo, press the Esc key.

How to Reach Adobe
For more information about Adobe Illustrator or any other Adobe product, call 1-800-833-6687.
