Release Notes for CFS Version 2.20

This release of CFS provides support for the complete function set of the product.

New additions in this release are:
Version 2.20
>   1) support for image files added.   The IMG format is rendered by the
>   View function.

Version 2.19
>   1) DDE processing is provided.

Version 2.18
>   1) Start up line arguments are more fully processes.   This includes the ability to add
>   a file to an archive from a switch option.   Form:
>
>   cfs.exe <archive> <option>
>
>   <archive> -- full path and file name of the archive
>
>   <option> -- one of the following valid options
>
>   /ADD:<filename> -- the names file is added to the archive
>
>   Example:
>   CFS t.cfs /ADD:\letters\1-1.doc
>   In this example the file 1-1.doc is added to the archive T.CFS.
>
>   2) New message processing is supported.   This message processing allows other
>   programs to send the /ADD file message to CFS.   The /ADD message supports
>   naming the archive and file to be added.   Please contact customer support for
>   additional information on programmer support and interface.

Version 2.17
>   1) Drop & drag - From file manager files may be added by selecting a file and
>   dragging it to the CFS application.
>   2) Free form text files fill data fields - The following words are searched for and data
>   is taken to the end of line to fill the field.
>   To:
>   From:
>   Subject: or Subj:
>   3) Mail message formats support for MHS.

CFS is provided as a *SHAREWARE* product.   We encourage you to make copies and
provide them to your friends and coworkers.   No modification of   the program or
documentation is allowed.
