

HyperCD

I wanted a CD player that didn't have a nag screen. I also wanted a CD Player that was small and always out of the way, I didn't want it to clutter up my desktop. I needed a CD player that stopped and started in exactly the same spot every time, I wanted all these things.

I asked HyperDyne 2000 and they wrote it for me (and you).

I hope you enjoy it and I'd like any ideas on making it more unique, but not necessarily more complicated if possible.

If you feel you've got any ideas or you'd just like to say thanks, drop an Email to my Compuserve address, 76702,1774.

If you've written something for MultiMedia, let's see it upload to your hearts content to the following forum.....

Just "Go SoundBlaster" at any ! prompt.

HyperCd was written for **Computamart** by the guys at **HyperDyne 2000 Software**, the ultimate force in MultiMedia.

Note:
HyperCD is not Public Domain nor is it Shareware, it's better it's yours, with our compliments. You can use it any way you wish but you may not edit it or change any part of it and this file must always accompany it.
