ICONVIEW 1.0

ICONVIEW - Setup & Problems

Before installing ICONVIEW, you must have installed VBRUN200.DLL in your windows system directory.

USING ICONVIEW

ICONVIEW is a simple utility for looking at all the icons in a single directory at once.

To use ICONVIEW just click on the drive and directory where the icons are stored. ICONVIEW ships with a few icons so you can see how it works.

REGISTERING ICONVIEW
ICONVIEW is not freeware. It is shareware. If you like ICONVIEW and continue to use it you must register it with Simplicity Computers. CD Master is protected by copyright laws. To register, print REGISTER.WRI and follow the intructions contained within.

FUTURE ENHANCEMENTS
What the future holds for ICONVIEW is governed by the registered users. Register now to get your requests in for new features. If we like you new feature, and you are first to tell us about it, you will receive the update for free. Registered use will receive notification of available updates which will be available for a minimal cost.
