

STARTUP MACRO NAME: \0

Executing \0 starts a macro that hides this notebook and adds three menu items to the tools menu. Tools|Tab label takes a block of labels and uses it to name a set of notebook page tabs. Tools|Enter allows you to enter values in the current block. Tools|Remove removes these menu items and closes this notebook.

If the autoload macro is disabled, this notebook can still be used as a macro library. [CTRL+T] runs the macro to enter tab labels. [CTRL+E] runs the macro to enter values or labels into a block. [CTRL+E] will use the direction that you last chose to enter the values.
