Upgrade Information for Win Multiple Configurations 3.0

Users of WMC V2.1c or earlier MUST perform the following procedure before using the "Only save group information" sub-option:

> Restore each of your saved configurations that uses Program Manager as its shell, this is accomplished by using WMCSTRT. Re-save the restored Windows configurations using WMCSAVE/WMCQSAV (V3.0 or later). After all the Windows configurations have been re-saved, the "Only save group information" sub-option can be used. If this process is not done, unpredictable results will occur when restoring a configuration saved with the "Only save group information" sub-option.
