

WinEuchre

Version 1.5

Welcome to WinEuchre, a Euchre card game written for windows. This is an upgrade of the first version of the game. Later versions will incorporate online help and loner hands. I'm also looking into modem play. If you enjoy and find yourself using this program alot please send a small donation to the author (thats me):

Peter Crosby

To install copy these files to the directory where you wish WinEuchre to reside.

EUCHRE.EXE
BLANK.INI
EUCHRE.INI
BLANK.PLY
EUCHRE.PLY
THREED.VBX
PICCLIP.VBX
ANIBUTON.VBX

Also copy this file to the WinEuchre directory or your Windows directory
VBRUN200.DLL

Be sure to set the startup directory as the WinEuchre directory so the program can find these files!

Thats it!

Also if you have any suggestions aimed at improving this program I would like to hear them!!

New with 1.5:

- *Ability to save players and their history (#)
- *Program starts with the last saved player used
- *Deal direction corrected

Yet to come (someday):

- *Loner hands
- *Real eehhm help files

Enjoy

Peter Crosby

If you want to reset the Name and Results files, rename BLANK.INI and BLANK.PLY to replace EUCHRE.INI and EUCHRE.PLY!
