

1993 Hardball III League.....This Year's Rosters!

People on Prodigy are continually asking for updated rosters and logos...So, I have finally put together the 1993 season for you, and just wanted to say a couple things about it. The majority of rosters are up to date as of May 12, 1993, some are not, but if they aren't, they aren't off by much! Pitcher rotations should all be correct.

If a real life roster has too many pitchers, I've selected those pitchers, then added an utility player that may not currently be on the roster (DL or Minors).

The batting orders should be very close to life like as well.

As you can see, I didn't redo all the logos, just some, so at least you'll have a start on them.

If you haven't downloaded HBSTAT V .5 yet, I urge you do to so, and then register for V 1.0. This utility will add the statistical realm to the game that is currently missing.

Have fun this summer with the league!
