Making The Grade v3.00 Rick Pedley   REGISTRATION $35.00
BUSI MAR93 MTG PEDLEY EDUCATION GRADES SCHOOL MARKS TEACHER
FILES: mtg300.sdn

PRODUCT OVERVIEW

Making The Grade is a complete system for storing and pro-
cessing student grades, and can accommodate as many as 40
students per class (as many as 15 students `offline') and
an unlimited number of assignments. 3.00 is a major update.

FROM A REGISTERED USER:

"I have been using your grading program now for a couple of
 months, and I continue to be in awe of its capabilities.
 It quite simply is superb! The reaction of the students to
 this program has been 100% positive. I gave each one a
 printed report card, listing all of his/her grades at int-
 erim report time. This not only cut down on arguments (Why
 did you give me that grade?), but also was particularly
 insightful for the parents. One of the strongest features
 of your program, among a plethora of features, is the mis-
 sing assignment printout. This has cut down my workload
 considerably. I am so pleased with it that I am going to
 order a copy for my niece as a gift."

 - Joseph L. Kalwinski, Davie, Florida

FEATURES (** = New feature)

o available in 360K or 720K format.
o department, school, school board site licenses available.
o separate network compatible version for site licenses.
o many printer types supported, including HP Laser Jet.
**design up to two custom printers.
o no copy-protection -- make as many backups as you like.
o optional password protection.
o easy to use, menu-driven interface, built-in help screens.
o uses weighted scores or `total marks', customized spread-
 sheet for data entry, allows `no score' instead of zero,
 immediate updating of test and student averages as new
 data is entered; no more end-of-semester all-nighters!
**`excused no score' as well as `no score'
o install your own letter grade scheme and pass percentage
o track attendance, unauthorized absence, times late.
**transfer a student from one class to another.

**classroom security lock so MTG can be left unattended.
o produce student cumulative graphs and test frequency dis-
 tribution graphs with a single keypress; mean, median,
 standard deviation, correlation coefficient, trends, and
 other statistics are calculated for you.
o built-in editor for keeping notes on students or for writ-
 ing up tests and course outlines, data is encrypted.
**Lesson plan editor.
**Auto-dialer: dial a phone number off the screen.
o specify a new mean and standard deviation and MTG will
 calculate adjusted test scores or final grades -- grading
 on the curve done correctly!
o 15 different reports can be printed, with many customizing
 options:

 a. progress report (120 comments)
 b. gradebook report #1
 c. gradebook report #2
 d. class information report
 e. attendance report
 f. class summary report
 g. missing assignment report
 h. individual grade report ** now include comments
 i. blank seating plan
 j. blank score sheet
 k. blank attendance chart
**l. lesson plan list
**m. list of assignments
 n. graph paper
 o. lined paper

o can print any screen or report to a file instead of the
 printer.
o department, school, and board licenses available, package
 includes special network version.
o written for teachers _by_a_teacher!_ Try the shareware
 version at no risk and no cost.
o register MTG and get MTG Plus at no extra cost! MTG Plus
 is a separate product written to take advantage of the 50-
 line mode available on VGAs and also requires 640K of RAM.
 MTG Plus can handle classes of 90 students & 90 tests per
 file.
o receive a free copy of Word Challenge with your order!
o available also for 128K Apple //e, //c, IIgs. Send for a
 free shareware copy.
**and many other improvements not listed here.
