

VBENGINE DATABASE TABLE MAKER

(Version 1.0)

Trademarks

Visual Basic and Windows are registered trademarks of Microsoft Corporation.

PARADOX is a registered trademark of Borland International.

PARADOX Engine is a registered trademark of Borland International.

The VBENGINE DATABASE TABLE MAKER program is a utility program designed to create PARADOX database tables and associated PRIMARY index files. This utility program is being distributed as a shareware product targeted mainly at Visual Basic programmers using the VBENGINE database development tool (a registered copy of this utility program and the User's Manual is included as part of the standard VBENGINE (version 1.0) product package). However, this utility program can be useful to any Windows developer working with PARADOX database files. Version 1.0 creates .DB and .PX files. Plans to provide for table restructuring and creation of Secondary indexes are in the works. To help fund any additional development of this utility program please register your copy of the program today. Registration is only \$10.00 and that provides you with notice of product updates, User's Manual, and free technical support. To register follow the directions given in the **How to Register** section of this document.

The VBENGINE DATABASE TABLE MAKER program was designed using Visual Basic and uses a small portion of the VBENGINE.DLL which was extracted and shipped with the product as TBLMAK.DLL. The program requires the following files to execute:

VBRUN100.DLL
TBLMAK.DLL
PXENGWIN.DLL

The files created are compatible with the PARADOX Engine (version 2.0). **SHARE.EXE** must be loaded before running this program.

Field types must be one of the types listed in the **Field Type** combo box. Alphanumeric fields (**AXXX**) have a valid range of 1 - 255 characters (A1 - A255). Field type **D** is for dates (January 1,100 A.D. to December 31,9999), **N** for numeric values, **\$** for currency values (15 significant digits including decimal place for real numbers in the range of $\pm 10^{-307}$ to $\pm 10^{308}$), **S** for short number values (-32,767 to 32,767).

For more information please see the User's Manual.

How To Register

Send check or money order for \$10.00 to:

Douglas A. Bebber
1834 37th Street
Rock Island, Illinois 61201

Questions regarding products should be directed to:

email (Internet address): bebberd@rr.bhc.edu
phone: (309) 786-9602

(Make notes payable to: Douglas A. Bebbler)

Bug Reports: Please send any bug reports or suggestions for product improvement to the address listed above (Postal and or Internet.)

Additional Information: Information on the VBENGINE (object-oriented API to the Paradox Engine for Visual Basic, C, and Pascal programmers), can be obtained by requesting such information from the above address (Postal and or Internet.)
