### **Fonts for You**

Fantazia Concepts has released a collection of fonts for people who want more than the "plain old" fonts. This unbelievable collection of more than 6,000 fonts is broken down as follows: 2,500 TrueType, 2,500 Type 1 (Postscript) fonts and 1000 Geoworks fonts. Every Truetype font on the CD-ROM has an identical match in Type 1 format, making it great for everyone who uses service bureaus or runs multiple platforms. This collection of fonts is truly the most unique collection available. Fonts for You is the largest collection of original fonts available. They were created and owned by Fantazia Concepts- they are not shareware. The collection is unlocked and uncompressed for easy use and access.

The fonts are categorized by style ex. Roman, Hollow, Jazzy, Unique, Spiked, Warped, Script, Basic etc... No longer alphabetically. There are no duplicates fonts found on this CD-ROM and we ensure

this with our no duplicate guarantee- if a user finds a duplicate we will send a free font for everyone they find. Also included is a beautiful book with a full sample of all the fonts. "Fonts For You" is the long awaited update to Fantazia Fonts and Sounds but has a very small duplication ratio to the fonts found on Fantazia Fonts and Sounds.

We have included a nice variety of fonts that can be a nice add on to your current fonts or a great starter collection for all your publishing needs.
