## 1.2 ScreenWizard.guide/Legal issues

Legal issues

\*\*\*\*\*

License

No warranty

Disclaimer

## 1.3 ScreenWizard.guide/License

License

=====

This license applies to the product called 'ScreenWizard', a program for the Amiga computer, published by Raymond Penners under the concepts of GreenWare, and the accompanying documentation, example files and anything else that comes with the original distribution. The terms 'Program' and 'ScreenWizard' below, refer to this product. The licensee is addressed as 'you'.

- \* You may copy and distribute verbatim copies of the program's executable code and documentation as you receive it, in any medium, provided that you conspicuously and appropriately publish only the original, unmodified program, with all copyright notices and disclaimers of warranty intact and including all the accompanying documentation, example files and anything else that came with the original.
  - \* You may not copy and/or distribute this program without the accompanying documentation and other additional files that came with the original. You may not copy and/or distribute modified versions of this program.
  - \* You may not copy, modify, sublicense, distribute or transfer the program except as expressly provided under this license. Any attempt otherwise to copy, modify, sublicense, distribute or transfer the program is void, and will automatically terminate your rights to use the program under this license. However, parties who have received copies, or rights to use copies, from you under this license will not have their licenses terminated so long as such parties remain in full compliance.
  - \* By copying, distributing and/or using the program you indicate your acceptance of this license to do so, and all its terms and conditions.
  - \* Each time you redistribute the program, the recipient automatically receives a license from the original licensor to copy, distribute
-

and/or use the program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

- \* You may not disassemble, decompile, re-source or otherwise reverse engineer the program.
- \* If you wish to incorporate parts of the programs into other programs, write to the author to ask for permission.
- \* You agree to cease distributing the program and data involved if requested to do so by the author.
- \* You may charge a fee to recover distribution costs. The fee for diskette distribution may not be more than the cost to obtain a public domain diskette from Fred Fish.
- \* You may use the programs for a period of up to 3 weeks for evaluation. After that, you have to register or quit using the program.

## 1.4 ScreenWizard.guide/No warranty

No warranty

=====

THERE IS NO WARRANTY FOR THE PROGRAMS, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAMS "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAMS IS WITH YOU. SHOULD THE PROGRAMS PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY REDISTRIBUTE THE PROGRAMS AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAMS (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAMS TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 1.5 ScreenWizard.guide/Disclaimer

Disclaimer

=====

---

No warranty, either express or implied, is made with respect to the fitness or merchantability of 'ScreenWizard'.

Raymond Penners (referred to as 'the author'), reserves the right to not develop any future versions of 'ScreenWizard'.

The author will try to make a good faith attempt at correcting any problems if any are discovered, but is in no way required, nor bound to correct them.

The author neither assumes nor accepts any responsibility for the use or misuse of these programs. He will also not be held liable for damages or any compensation beyond the original registration fee due to loss of profit or any other damages arising out of the use, or inability to use this program.

The author will not be liable for any damage arising from the failure of this program to perform as described, or any destruction of other programs or data residing on a system attempting to run the programs. The user of this program uses it at his or her own risk.

## 1.6 ScreenWizard.guide/Registration

Registration

\*\*\*\*\*

'ScreenWizard' is made available under the concept of Green-Ware. You may use the programs for a period of up to 3 weeks for evaluation. After that, you have to register or quit using the program. Registering is done by becoming a member of any organization interested in the welfare of nature and/or animal wildlife (e.g. WWF, GreenPeace, ...). If you already are a member of any such organization, then this doesn't apply and you may use the programs for as long as you wish.

## 1.7 ScreenWizard.guide/Introduction

Introduction

\*\*\*\*\*

Anyone using the Amiga probably runs into public screens sooner or later. Perhaps you are reading this on a public screen right now? Public screens are very handy. However, public screens are not as configurable as the workbench screen. Most programs that are able to run on a public screen have more or less options to configure the looks of the screen they run on, but programs capable of adding nice patterns or pictures to the screens' background are very rare. The programmers are not to blame, since it would be a waste of HD space if every program had all these options built-in. Wouldn't it be nice if there was just one small commodity capable of opening configurable public screens whenever an application needs one, and closing the screen

---

automatically after the application is done? This is where 'ScreenWizard' steps in.

Let's say you've defined a screen named 'FOOBAR' using the preferences program. Now, whenever a program tries to display itself on this screen, 'ScreenWizardCX' (the commodity) will create this screen for the program to run on, with all bells and whistles. So, the following command makes multiview display it's picture on a screen you defined, without you having to worry about opening and closing the screen yourself.

```
7.Workbench:Utilities> multiview foobar.ilbm pubscreen=FOOBAR
```

As the program isn't very complicated, this is where the documentation stops. Let's conclude with a small summary of features:

- \* 'ScreenWizard' consists of a stand-alone preferences program, and a small commodity. Once the program is configured, only the commodity needs to be resident, eating up very little memory.
- \* Screens are opened and closed just as if the screens were opened by the programs themselves. So now you can give your favourite editor a nice background (instead of the standard boring grey look), without the hassle of opening/closing screens yourself (which is most common for other public screen managers).
- \* Background pictures, as well as background patterns are supported.
- \* Very configurable screens: palette, displaymode, drawing pens and more, all these can be set after your personal taste.

## 1.8 ScreenWizard.guide/Program updates

Program updates

\*\*\*\*\*

Whenever a new release of 'ScreenWizard' becomes available it will be uploaded to:

```
Grafix Attack (SysOp: Kees Huizer)
+31-(0)10-4745816 (V32Bis)
+31-(0)10-4741062 (19k2 ZyXEL)
+31-(0)10-4744682 (28K8)
```

```
FidoNet: 2:286/407.0
AmigaNet: 39:153/201.0
NLA: 14:101/200.0
```

```
Decades BBS (Sysop: Thomas Andersson)
+46-54-831561 (USR 28.8 V.Everything)
```

```
FidoNet: 2:203/625.0
AmigaNet: 39:160/105.0
```

---

## 1.9 ScreenWizard.guide/Future

Future

\*\*\*\*\*

Quite frankly, I hope this program doesn't have a future :-) I would like to see a program like this to be included in the distribution of the operating system, just like the "Prefs/WBPattern" program does. Since this is currently not the case, feel free to contact me (see

Author Info

) for any suggestions or comments you have concerning this program.

## 1.10 ScreenWizard.guide/Acknowledgements

Acknowledgements

\*\*\*\*\*

I would like to thank the following people for support, suggestions, help and assistance: Richard Schiffelers, Thomas Andersson, Heikki Kantola ...

Special thanks go to Olaf 'Olsen' Barthel, for releasing the sourcecode of 'term' and creating 'gtlayout.library'. Great work!

Some quick greetings to: Erwin Penders, Mel Nijsten, Maurice Penners, Walter Konrad, Frans Bouma, Robert Udo, Bart Cremers, Arnaud Gouder de Beauregard, Walter Dees, Rino Roufs, Rex (the ONE and ONLY SPHINX-O-Dog), Marcel Meuldiijk, Edwin Boesten, Ephrem Bollen, Marcel Franquinet ...

Furthermore I would like to say hello to all 'dudes' on IRC : Ikke, Bilbol, Savage, Dense, Milano, Pjotr, ALFred, Mnemo, Xed, SteveVai, Zop, Janne, Outland, Mjoelnir, Juggi, Goldrnr, Lundman, Shocker, Mag, VAG, Herb, \_ho\_ and everyone I know but forgot to mention here!

These are all listed in chaotic order! I am sorry if I forgot someone (which I'm sure I have) ...

## 1.11 ScreenWizard.guide/Revision history

Revision history

\*\*\*\*\*

Release 1.0

---

Release 1.1

## 1.12 ScreenWizard.guide/Release 1.0

Release 1.0

=====

Release 1.0 appeared 16-Feb-1995.

\* First public release.

## 1.13 ScreenWizard.guide/Release 1.1

Release 1.1

=====

Release 1.1 appeared 31-Mar-1995.

- \* Trim under screen bar can be configured in the drawing pens.
- \* Accidentally used the phrase "Active window titles" twice to describe different pens.
- \* Double-clicking an entry now opens the attributes panel.
- \* Screen font is now configurable.
- \* Location of multicolor pens can now be configured. This should make things work for a combination of MUI and a MagicWB palette.
- \* Just a note: the program really is distributed as greenware, this is no joke.

Important: the format of the configuration file has changed. ScreenWizardCX will only load config files of the newest type. However, the prefs program can is able to load old files. I won't do this for the commodity, because it would only make the program a bit larger. This means that you'll have to re-save your config after installing the new versions.
