

ATMLink

ATM Network Interface Cards

Delivering performance and high availability with standards-based ATM connectivity for servers and high-performance workstations.

The ATMLink PCI 155 network interface cards provide high performance, ease of use, and configuration flexibility for today's servers and high-performance workstations. 3Com's unique Resilient Server Link (RSL) architecture provides unmatched redundancy at the edge of the ATM network.

ATMLink™ PCI 155 network interface cards (NICs) support DynamicAccess™ features such as Resilient Server Link (RSL) that enable “standby” NICs to take over following a primary NIC connection failure. Combined with “dual homing,” RSL allows ATMLink PCI 155 NICs to connect to different switches for additional redundancy, ensuring the server remains available even if one of the attached switches fails.

ATMLink PCI 155 NICs support ATM Forum LAN Emulation (LANE), providing standards-based compatibility for legacy LANs as they migrate to ATM.

Ideal for servers, the ATMLink PCI 155 NICs include Ethernet and Token Ring LAN Emulation, traffic shaping, and 16 LAN Emulation Clients (LEC) per card, with a total of four cards and 64 emulated LANs (ELANs) per system.

Key Benefits:

- **Availability.** ATMLink PCI 155 NICs feature 4,096 open Virtual Connections (VC), RSL redundancy for maximum uptime, and dual homing for connections to multiple switches.
- **Management.** SNMP LEC MIB allows for management via Transcend® software; traffic shaping on a per ELAN basis offers more efficient network designs.
- **Flexibility.** Offering Ethernet and Token Ring LANE in the same system, the NICs support up to 64 ELANs per system, configurable VPI/VCI range, configurable ILMI VPI/VCI, and configurable number of standby RSL NICs.
- **Standards Compliant.** The NICs conform to UNI 3.0/3.1 signaling, ILMI specifications, and ATM Forum LANE 1.0 for interoperability between legacy LANs and ATM systems.
- **Performance.** Hardware-based Segmentation and Reassembly (SAR) and AAL5 provide optimal efficiency and throughput.
- **Ease of Use.** Simplified installation and configuration procedures make the ATMLink PCI 155 NIC very easy to install. ATMLink utilities show NICs, ELANs, connection information, and statistics.

ATMLink PCI 155 NICs with the DynamicAccess feature RSL allow you to configure your ATM network with maximum flexibility and redundancy. Here a server is configured with four ATMLink PCI 155 NICs, two to each CELLplex 7000 switch. If one part of the primary connection fails, a

standby NIC will activate using the primary NIC's profile and connections even if the standby NICs are connected to a different switch. RSL allows complete flexibility in configuring active and standby NICs, from four active to one active and three standby for maximum redundancy.

Specifications

ATMLink ATM Network Interface Cards

Compatibility

Software

ATMLink PCI 155 NIC ships with:
NetWare 3.12 and 4.X
Windows NT 3.51 and 4.0
DOS Diagnostics
16 LECs per NIC
Four NICs per server
UNI 3.0 and 3.1
ILMI (with configurable VPI/VCI)
Configurable VPI/VCI range
DynamicAccess feature, RSL
Traffic shaping per ELAN
(1 to 155 Mbps)
SNMP MIB (Windows NT only)

Hardware

PCI 2.0-compatible computers

Connectors and Operating Distances

3C975-Fiber—Duplex SC connector supports network segments up to 1.2 mi/2.0 km over 62.5/125 multimode fiber
3C975-UTP—RJ-45 connector (female): Category 5 UTP on two pairs up to 328 ft/100 m

Random Access Memory

128 KB on board

LEDs

Single LED reports link status

Physical Dimensions

Length: 6.150 in. (15.62 cm)
Width: 4.2 in. (10.67 cm)

Power Requirements

10 W (1.5 A @ 5 V, .02 A @ 12 V)

Safety and Electromagnetic Compatibility

The ATMLink PCI 155-Fiber card meets the requirements of FCC Part 15, Subpart J Class B
The ATMLink PCI 155-UTP card meets the requirements of FCC Part 15, Subpart J Class A

Ordering Information

ATMLink PCI 155-Fiber network interface card	3C975-Fiber
ATMLink PCI 155-UTP network interface card	3C975-UTP

Warranty Summary

3Com provides a lifetime warranty for its ATMLink PCI 155 NICs. Refer to the warranty statement in the product manual for details.
