

COSESSION REMOTE™

Supports
Windows 95
Windows 3.x
and DOS

Complete Remote Computing and file transfer in one package

CoSession Remote™ lets you access and control a distant PC and its resources from any location — as if you were there. You can run programs, check e-mail, access data, print reports, transfer files, or observe the operations of another PC user. Industry-leading features and Windows 95 support make it easy to access your home or office PC, no matter where you are. With CoSession Remote, you're never out of touch with the resources you need.

Most affordable remote control

CoSession Remote provides industry-leading performance, features and support at a much lower cost than other remote control products.

Connect to any PC or network

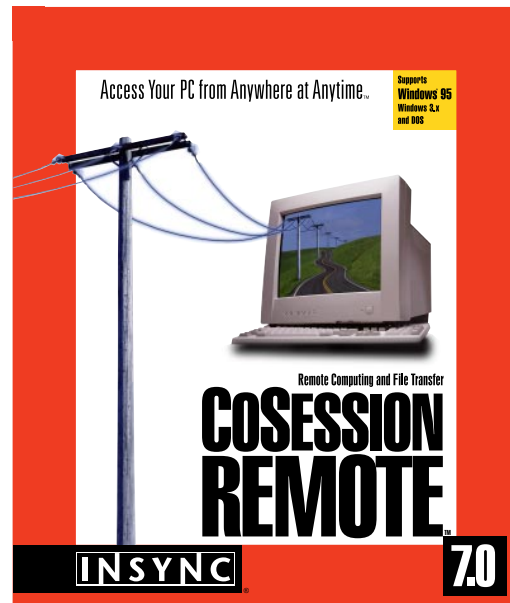

CoSession Remote supports Windows 95 as well as Windows and DOS applications. CoSession Remote offers a variety of connection choices. You can connect to PCs over modems or across NetWare®, LANtastic®, Windows 95, IPX/SPX, NetBIOS, NetBEUI and Winsock (TCP/IP) networks, including the Internet.

Fastest CoSession ever

Major speed improvements make CoSession Remote one of the fastest products on the market, saving you time and money. Connect to PCs, transfer files and access data in a flash.

State-of-the-art Intelligent File Transfer

Perform high-speed drag and drop file transfers with the click of a mouse. Use CoSession Remote's

Intelligent Transfer feature to send only the changes you make to a file — saving you time and money. Updating files has never been easier.

File synchronization and cloning

Keep the data on your notebook or home PC in sync with the data on your office PC.

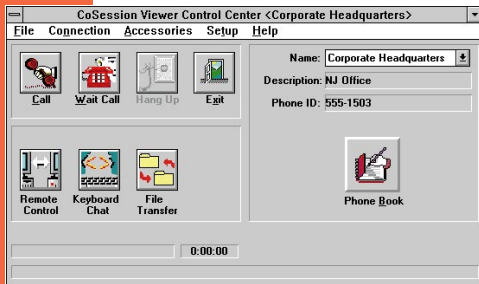

Easy to use

The setup program automatically detects a modem, COM port and baud rate. Just enter a phone number and you can make instant connections.

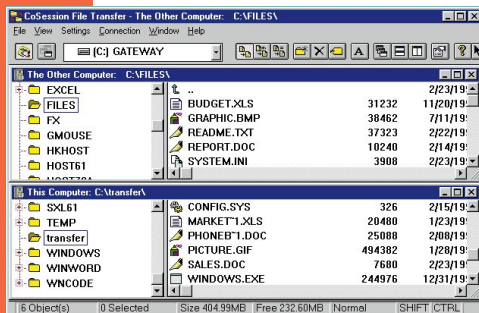

The safest

Includes password protection, automatic dial-back, file transfer restrictions, global and individual directory access restrictions, screen blanking, keyboard and mouse locking, login notifications and more.

INSYNC

CoSession Remote's intuitive interface makes set up and instant connections easy.

All file transfers can be performed simply by dragging and dropping files.

Features/Benefits

- Major speed improvements for the fastest CoSession ever
- Intelligent Transfer that sends only the changes to a file during a file transfer
- File synchronization and cloning
- Windows 95 and Windows 3.x compatibility
- Make connections over modems or across NetWare, LANtastic, Windows 95, IPX/SPX, NetBIOS, NetBEUI and Winsock (TCP/IP) networks, including the Internet
- Simultaneous remote control and file transfer
- Setup automatically detects a modem, COM port and baud rate
- True color support (up to 1280 x 1024, 16 million colors)
- Super-fast screen updates
- Remote printing
- Multiple levels of security
- Award-winning **free** technical support for current version

Applications

- Telecommuting: With CoSession Remote, you can work from home and still have access to your office network and its resources.
- File transfer: Perform high-speed file transfers just by dragging and dropping files.
- Remote network access: Access the network and all of its resources from a distant location. Run network applications like e-mail and databases.
- File synchronization and cloning: Perfect for handling file management tasks between two computers.
- Remote support: Support PC users without the time or expense of on-site service calls.
- Training or Help desk: Instruct users at distant offices without the expense of on-site training. Use internally to support PC users.

System requirements

- Intel® 386, 486 or Pentium® processor (or a compatible non-Intel processor)
- Windows 3.1 or higher, running in Enhanced mode, or Windows 95
- DOS 5.0 or later
- Minimum 4 MB of system memory (8 MB with Windows 95)
- For modem connections, Hayes®-compatible or other asynchronous modem or null-modem cable

The two PC version contains both the Host and Viewer programs, licensed for two PCs. Both Host and Viewer programs are also sold separately.
