

ImageCenter™ 150ocr

MULTI-FUNCTION IMAGE SCANNER

An easy to use system that expands the uses of your PC.

Take your PC and printer, add a Brother ImageCenter150ocr and you've created an entire desktop communications and document management center. You can scan any kind of document—graphics, text or data—in your system for electronic filing, plain paper copying, printing or faxing. And thanks to its Xerox TextBridge® Optical Character Recognition, you can edit the text you've scanned, which saves you untold hours re-entering text and data. You can then use your data in popular word processing and spreadsheet applications. Business Card Reader Software converts your business cards into a quick access electronic database. If you have a fax/modem and software, you can electronically send scanned images anywhere via fax or E-mail, which can save you a bundle in express mail and messenger charges.

The ImageCenter can increase your efficiency and save you time and money, which makes it the perfect addition to any home or office.

SYSTEM REQUIREMENTS

- Computer:** IBM® PC/AT or PS/2 compatible computer with a 386 processor or higher.
- OS:** MS-DOS® ver. 3.3 or later / Windows™ 3.1-3.11 running in 386 enhanced mode.
- Memory:** 4 MB (8 MB recommended).
- Disk Space:** 1 MB for installation (plus 4 MB for OCR installation). Additional space is required to save scanned images.
- Display Adapter:** VGA or higher (SVGA recommended).
- Interface Port:** One parallel port (chained connection with the printer). Compatible port with IBM® PS/2 with IEEE 1284 Byte mode is recommended for fast scanning.
- Mouse:** Windows™ compatible pointing device.
- To Fax:** An internal/external class 1 or 2 fax modem with bundled fax modem driver for Windows.™
- Printer:** HP® compatible laser or ink jet printers.
- Cables:** Two standard parallel printer cables for chained connection.
