

**MFC-7550MC**

**6 in 1**

**LASER MULTI-FUNCTION CENTER  
MFC**

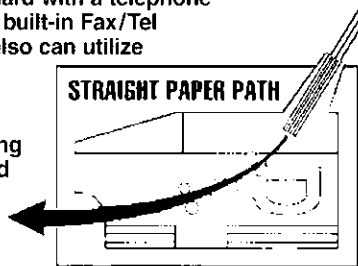

## ALL THE FUNCTIONS YOU NEED THE HIGH PERFORMANCE LASER OUTPUT YOU DESERVE

There are "no compromises" here! No office clutter. No wasted time walking from machine to machine. And every separate functional area stands on its own as a high quality, feature packed fax, printer, copier, scanner, PC fax and message center. The Brother 6 in 1 Laser Multi-Function Center is the only way for you to combine six high performance products and the high quality laser printing output you deserve...so why compromise? In addition, the Brother MFC-7550MC utilizes a 600 x 600 dpi quality printing system that is faster, clearer and less costly to operate than ink jet units.

### IT'S A **FAX**

You get a high quality, feature packed laser plain paper fax. It can store up to 150 pages for out of paper reception, send faxes at 14.4k bps, broadcast faxes to up to 59 locations, and quickly scan your documents into memory before they are sent, so you don't have to wait for your originals. Its large paper capacity, 30 page automatic document feeder and 200 sheet paper cassette mean you'll be able to take care of business.

It can also be used with your existing phone line, because it comes standard with a telephone handset and built-in Fax/Tel switch. You also can utilize local phone company services like distinctive ring detection and Caller ID.

Plus, a power save mode means that it is energy star compliant.

### IT'S A **PRINTER**

Today's businesses need a printer that can combine speed, quality output, and low running cost. The MFC-7550MC does just that with up to 6 page per minute printing, true 600 x 600 dpi laser output, and a lower cost per copy than ink jet printing.

Its 1MB memory, with Enhanced Memory Management, allows you to print a full page of graphics. It is optimized for printing under your Windows® 3.1, 3.11, or Windows® 95 environment, but also comes standard with PCL-4 emulation.

### IT'S A **COPIER**

You need a convenience copier but not one that's inconvenient to use. The MFC-7550MC gives you copying productivity right at your desk. At your fingertips you'll have a copier that can do up to 99 copies unattended. Plus it has reduction and enlargement capabilities from 50% to 200%.

But best of all, its 600 dpi copy quality is far superior to others in its class.

### IT'S A **SCANNER**

You get high resolution scanning performance that is unparalleled in a multi-function device. You can quickly and easily scan text, logos, line art and business graphics into your Windows® applications at up to 8 pages per minute. You get up to 600 x 600 dpi (interpolated) resolution, 256 gray scale for photo scanning and it is Twain Compliant to work with popular software applications.

Its easy to use Viewer lets you "drag and drop" images precisely into folders for quick filing, repaginating or archiving. Plus it includes the Xerox® TextBridge® OCR software.

### PC FAX

Many of the faxes you send are created on your PC. Now you can send those faxes directly from a Windows® application through your MFC-7550MC without printing it! You can also receive incoming faxes directly into your Windows® based PC to save paper and eliminate junk faxes. You'll have advanced fax sending functions from your PC such as an unlimited fax and group number storage base broadcasting and a custom text CoverPage™

Edit and mark up your faxes with a complete set of drawing tools. Also a Binary File Transfer Utility allows you to use your MFC to transfer data files to another PC, thus sending copies of your files faster and easier than by fax (copiable reader program is included).

### IT'S A **MESSAGE CENTER**

The Message Center is the perfect personal assistant, storing up to 30 minutes of incoming voice messages into your MFC memory. Or store your messages directly to your PC hard disk drive for expanded storage.

You can also program it to save and forward fax messages to another phone number as they're received or to activate your pocket pager after each received message. You can even store documents for other callers to retrieve - a perfect way to provide valuable information to your customers and colleagues!

THE ULTIMATE HOME OFFICE COMPANY

**brother** We're at your side.

## FAX FEATURES

- 30 page auto document feeder
- Stores up to 150 pages\* for out-of-paper reception.
- Broadcasting (up to 70 pages\*)
- 14.4K bps high speed fax modem
