

MULTIPASS™ C3000 COLOR BUBBLE

See What We Mean.™

The MultiPASS C3000 gives your home office the power of a big company with professional-quality color printing, copying, scanning and faxing.

Canon PhotoRealism™ makes every document you print look better.

Only Canon printers come with our exclusive PhotoRealism technology. And, from the first page you print, you'll be amazed by the difference it makes in your documents.

Instead of the blurry, washed-out photos you get with most printers, you'll see color images that look almost as good as the original. You'll print realistic fleshtones, shiny chromes, brilliant whites and rich black tones. But Canon PhotoRealism isn't just for photos. When you print charts or graphs, you'll get colors that leap off the page. Canon PhotoRealism also gives you darker, sharper black and white text that's a pleasure to read.

No matter what type of document you print, you'll soon realize why Canon PhotoRealism has become the new gold standard in color printing.

Print everything you need for your home office.

The MultiPASS C3000 offers you more than high-quality printing. It also has the versatility you need to create and print a wide range of documents.

You'll be able to choose from an incredible array of papers. The MultiPASS C3000 handles materials like envelopes, card stock and transparencies as easily as it handles plain paper. And when you buy the MultiPASS C3000, you'll also get Canon Creative. It's an easy-to-use software suite that gives you the power to design all kinds of documents—even if you have no design training. With programs like Design Essentials™ and ColorStore™ 2.0, you'll have the tools and templates to create everything from brochures and presentation materials, to greeting cards and T-shirts.

Canon Creative also includes amazing WebRecord™ Internet printing software, the total solution for printing off the Web. WebRecord fetches the entire Web site for you, enhances background color and graphics, and organizes each page before printing. With WebRecord and your Canon Color Bubble Jet Printer, you'll print pages from the Web that are crisp, clean, and clear.

It's another smart solution from Canon.

Fax without delays or hassles.

Now you don't have to be a big company to afford a full-featured fax machine. The MultiPASS C3000 takes advantage of Bubble Jet printing to produce incredibly clear faxes on plain paper. Which means no more curly pages you can't read.

To make sure you get all your faxes, there's a memory of up to 42 pages* that saves faxes if you run out of paper or ink. The memory also lets you print and scan while still receiving faxes.

When it comes to sending documents, the MultiPASS C3000 is a real time saver. Its 14.4 Kbps transmission rate lets you send a page in only 6 seconds. And there's a 20-page document feeder to quickly handle those big jobs. You can even send and receive faxes directly from the desktop of your PC.

Scan documents the easy way.

When you have a MultiPASS C3000, you don't have to be a professional graphic artist to add your own custom images to documents. You'll scan photos, drawings, logos and other images right from your desktop.

Then you can use your free Canon Creative software to drag and drop images directly into your favorite applications. Take them into ColorDesk Photo to remove imperfections and apply artistic effects.

Or use TextBridge Classic OCR software to edit text in documents without retyping everything.

Have copies whenever you need them.

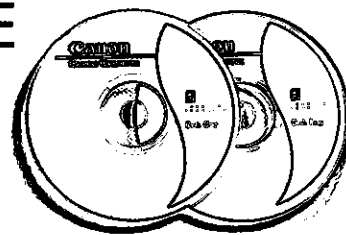

Those midnight runs to the local copy center will become a thing of the past. With the MultiPASS C3000, you can make high-quality copies right at home at up to 360 dpi resolution. So even photos will come out looking great. And since there's never enough time these days, the MultiPASS C3000 copies at 3 pages per minute.

Rest assured you'll always get help when you need it.

On top of all the features that come with your MultiPASS C3000, you'll also get peace of mind knowing you're backed by the service, reliability and durability that could only come from Canon. You get the assurance of a 1-year limited warranty with InstantExchange.*** And if you ever have a question, toll-free automated support for troubleshooting issues on most current products is available 24 hours a day, seven days a week. So you can spend your time concentrating on getting your work done, not worrying about your office equipment.

FREE INSIDE

Canon gives you the tools to print anything!
