

Twister

A new spin on intranet servers.

The Time Has Come.

Twister plugs into your network in a second. Bam, there you have it, an intranet website, accessible with any web browser on the planet.

It's just the thing for workgroup publishing and information sharing.

And to make it even easier, Twister comes bundled with leading website development and publishing tools.

Twister's internal hard drive has 1 GB of storage, but if you need more, you can connect an additional SCSI hard drive or a removable media drive.

Easy to Configure and Manage. Twister installs and configures out of the box in minutes. Plug in an Ethernet cable, set the IP address, and it's ready to go. Then access the easy-to-use Setup Wizard to get your site up and running immediately. Its user-friendly interface and extensibility make Twister the ideal choice for a wide variety of customers and applications. No other software is required.

Cost-Effective Solutions.

There are two good reasons why Twister is the most cost-effective intranet server solution. First, it has none of the complexity of traditional systems which rely on separate hardware, operating systems, and web server

software. This integration reduces administrative overhead and

lowers your cost of ownership by making deployment easy. Second, with over 3 Mbps throughput, Twister offers compelling performance. So instead of worrying about the price, you just plug it into your intranet and let it go to work. Which is an excellent idea.

Compact Devices
BIG IDEAS.

Features

Instant intranet site

- Simple step-by-step Setup Wizard for home page customization
- Generic intranet sites included for all company departments
- Directory Page Wizard and File Mover application for simple document posting
- Authoring and publishing tools included to enhance site

Simple Administration

- Plug-and-play installation
- Netscape Navigator or Microsoft Internet Explorer is the only software required for interaction
- No day-to-day management
- Hides complexity of traditional web server

Provides over 3 Mbps of data throughput and at least twenty concurrent connections per second

- Superior price/performance for departmental intranets and entry-level web hosting

Support for multiple peripherals

- Supports an external hard drive, Zip drive, or multiple CD-ROM drives

Small footprint

- Compact size fits comfortably on desks and allows for easy portability
- Built-in universal power supply

Upgradeable software in flash memory

- Protects investment with upgrade path to future enhancements

Third party applications

- Claris Home Page provides an easy-to-use tool for web authoring
- Net-It Now transforms desktop documents into live web pages

Benefits

Specifications

Product Model:

- Twister-1G-TP
1 Gigabyte hard drive,
10BaseT
- Twister-1G-BNC
1 Gigabyte hard drive,
10Base2 via external
BNC transceiver

Requirements:

- 10BaseT or 10Base2 Ethernet
- TCP/IP
- Netscape, Microsoft Explorer, or other compatible browsers to access files

Hardware Specifications:

Environment Operating: 0° to 40°C;
10 to 95% humidity

Network interface 10BaseT (RJ-45)
10Base2 (via external
BNC transceiver)

Dimensions • Height x width x depth:
2.25" x 7" x 8.125"
(58mm x 180mm x 210mm)
• Weight: 4.5 lb (2 kg)

LEDs:

- Power
- System OK
- Network OK
- Network Activity
- SCSI Activity

External SCSI file system supports:

- One external Zip drive or hard drive (maximum size 2 GB)
- Five CD-ROM drives

Serial port for configuration

Software Specifications:

Embedded operating system:

- Multitasking kernel
- Read-only CD-ROM (ISO 9660) file system
- Read/Write DOS FAT file system
- Content search function
- SCSI support
- Ethernet support

TCP and networking applications:

- Nonblocking; minimum of twenty concurrent connections per second
- Telnet
- FTP
- Remote Copy Protocol (RCP)
- TFTP (server)
- Syslog (server)
- BOOTP (client and server)

IP configuration:

BOOTP, serial port, Reverse Address Resolution Protocol (RARP), Dynamic Host Configuration Protocol (DHCP)

Protocols: HTTP 1.0 compliant

Management:

- Simple Network Management Protocol (SNMP)
- Management Information Base (MIB) II
- HTML-based management
- Embedded Setup Wizards

Applications:

- File Mover Utility (Win 95, NT 4.0)
- Instant IP (BootP) (Win 3.1, WFW, Win 95, NT 3.51 or 4.0)
- Claris Home Page web authoring tool
- Net-It Now document publishing utility (Win 95, NT 4.0)

Regulatory/Agency Approvals:

- FCC Class A
- CE
- CSA
- VCCI
- TUV
- UL

Power Requirements:

- Input voltage: 100 to 240V, 50/60Hz

Output Ratings: +5V, 2A
