

# Oil Change

**Updates Your Software Automatically Using The Internet**

Keep your PC running at peak performance by retrieving and installing the latest software updates and hardware drivers from the Internet. Oil Change identifies all your software and hardware and then hunts down and installs the exact updates you need. Oil Change even provides you with a helpful description of each update so you'll know exactly what improvements you are getting.

**N**ew software updates and hardware drivers are being released on the Internet every day. Designed to fix bugs, improve performance and add great new features to your PC, most of these updates are available for FREE!

However, finding out about them and then locating and downloading the updates is a time consuming hassle. You'd have to contact a different company for each application, game, printer, scanner, display card, etc., that's on your PC.

## Key Features

- Identifies all installed software and hardware drivers on your PC
- Locates new updates, patches and drivers on the Internet
- Downloads and installs the updates you select
- Gets new plug-ins for your Browser
- Tunes up your software for peak performance
- Keeps your PC up-to-date
- Gets you the latest and greatest enhancements for your PC
- Easily lets you "UNDO" your last update

## You Could Keep Your PC Running Smoothly If Only You Could Get These Updates.

- But how do you find out about the latest updates?
- What Web sites should you be checking out regularly?
- How do you know if the update you found is the one you need?
- How do you make sure that you have installed the update properly?

## Oil Change Does The Work For You!

Oil Change gives your PC a digital oil change over the Internet. Just as your car needs an oil change every 3,000 miles in order to prevent engine problems, your PC needs periodic software updates to keep it up-to-date and running smoothly.

# Oil Change

## Here's What Top PC Mechanics Are Saying:

"Could be the most significant program to hit your hard disk in many a moon."  
— Netguide

"The most advanced on-line tune up."  
— CNET Television

" [with this] digital oil change ... you have not just software but living software."  
— Chiptalk KNX Radio

" Oil Change ensures your computer is running the newest software ... it doesn't get any easier than that."  
— Time Magazine

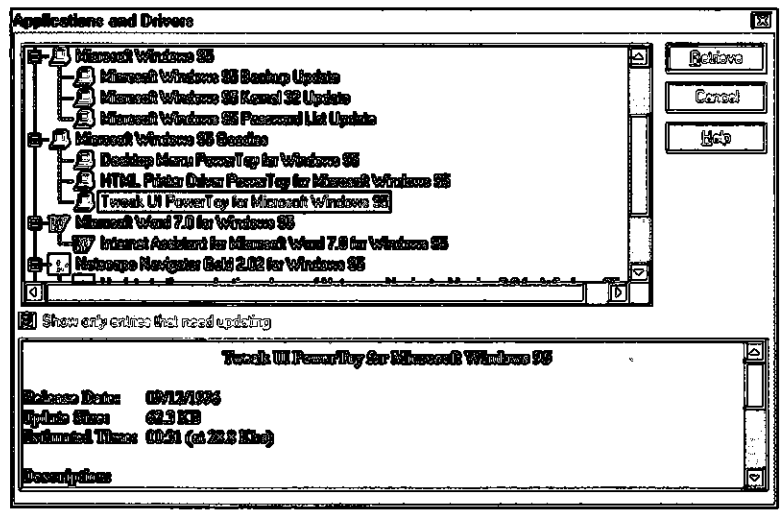

## Here's How Oil Change Works:

- 1) Oil Change identifies all the installed software applications and hardware drivers on your PC.
- 2) Oil Change then checks with CyberMedia's master list of new updates and drivers that are currently available on the Internet and gives you a helpful description of each update so you'll know what benefit each update will provide.
- 3) You then select only the updates you want. Oil Change downloads and safely installs your new software automatically.

## It's Easy and It's Risk Free!

Oil Change saves a backup of everything it changes so you can always undo your last update. One click and your PC's original set-up is restored.

*System Requirements: Windows 95 operating system, IBM PC or compatible with 386 or higher processor, 8 MB minimum RAM, 6 MB of free hard disk space for installation, Microsoft mouse or compatible pointing device, Existing Internet connection. For use in US and Canada only.*

Oil Change provides you with a list of all the new updates and drivers that are currently available for your software on the Internet.
