

S N A P PC EXTENDER™

Extend your Keyboard, Monitor and PS/2 Mouse up to 600 feet Away with Category 5 UTP Cables

- ▶ Utilizes Category 5 UTP Cables for lower installation cost
- ▶ Supports all 100% Compatible PCs; 1280 x 1024 non-interlaced resolution
- ▶ Works with monochrome and color VGA/SVGA/XGA monitors

Expand the Reach of your Computer System

Keep your PC in a secure, climate controlled environment and still have access from crowded or harsh work areas up to 600 feet away! By removing your CPU from your busy work area, you protect the most valuable components of your system and free up needed work space too!

Making Extended Distance Operation a SNAP!

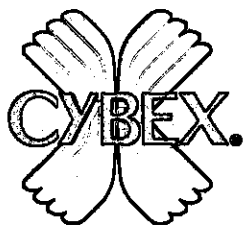

With the new, groundbreaking SNAP technology from Cybex, your video, keyboard and PS/2 mouse signals are carried across two Category 5 UTP cables – the same type used by many Ethernet networks. UTP (Unshielded Twisted Pair) cabling provides increased resistance to interference for high quality video transmission.

Maintain System Security

PC-Extender SNAP takes the worry out of system security. Place your system unit, software and sensitive data in a secure area to minimize tampering, system damage and unauthorized software installation.

Easy Installation

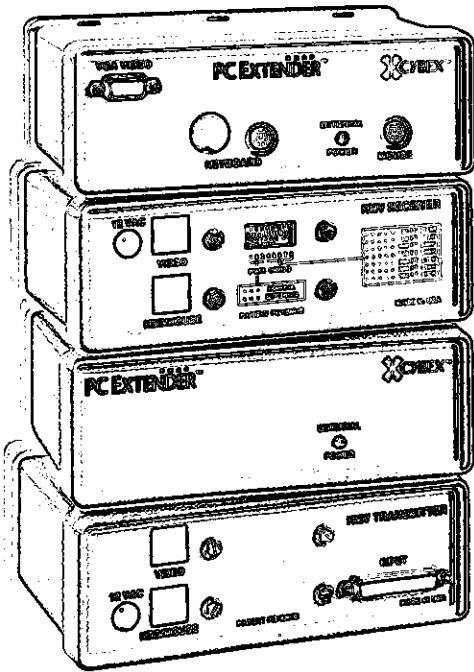

PC-Extender SNAP is simple to install; no software or expensive networks are required. Just place your peripherals at your remote location, connect the cables, and use your PC just as if it were in the same room.

SNAP PC EXTENDER™

To order, consult the table below. Select the appropriate transmitter/receiver/input cable kit, plus two extension cables. Bulk cable and termination kits are available to qualified installers. To attach two or more keyboards, monitors and mice to a single computer, ask about our PC-Companion Plus and PC-Expander Plus products!

Ordering Information

Transmitter and receiver, front and rear views.

A PC-Extender SNAP system consists of a transmitter located at the computer and a receiver at your remote workstation, linked by dual UTP extension cables. An input cable connects the transmitter to your system unit. A 12 VAC transformer is included to power the transmitter. The remote workstation supports either a monochrome or color VGA monitor, and a PS/2 style mouse.

Extender SNAP (Transmitter, Receiver and Input Cables)

Video	Keyboard	Mouse	Standard Part Number (25-300 feet)	Extended Distance Part Number (350-600 feet)
VGA	5-pin & 6-pin	None	PEKT-0	PEKTX-0
	6-pin	PS/2	PEIT-0	PEITX-0

UTP Extension Cable (Video and Keyboard/Mouse)

Standard
C5T-x*

*Replace 'x' with the length of the cable required using 50-foot increments up to 600 feet (i.e. C5T-350). A 25-foot cable is also available.
