# COMMANDER

■ AutoBoot technology in a new slimmer size

■ Supports both PS/2 and serial mice

■ Designed for 19-inch rack applications

**Control up to 96 PCs or file servers with just 1 keyboard, monitor and mouse!**

ntroducing the leanest, most streamlined member of the AutoBoot™ family. At 1.75 inches high, the Slimline Commander™ can be fitted into your computer rack using a minimum of panel space.

**Easy Integration into your Existing System**
The Slimline Commander integrates easily into your existing system, protecting your investment in equipment. It supports the full range of VGA monitor types, including XGA, XGA-II, and SVGA. Both serial and PS/2 mice are supported, as well as PC/AT and PS/2-style keyboards. No special adaptors are required.

**Channel Scanning and Broadcast Capabilities!**
Commander's built-in scanning feature allows you to scan through the computers in your system sequentially without user intervention! Your keyboard remains operational during the scan process; scanning will pause while you work, then resume with the next channel in sequence.

With Commander's Broadcast Mode, you can enter data into multiple computers at the same time! You choose which computers to broadcast to. Once you enter Broadcast Mode, whatever you type will be sent to all of the computers you have designated.

**Add-on Expandability**
Slimline Commander can easily keep pace with your growing system. A base unit supports 2, 4, 6 or 8 attached computers. Expansion units can be added at any time, supporting up to 8 computers each. Order only what you need now, then add additional units as you need them.
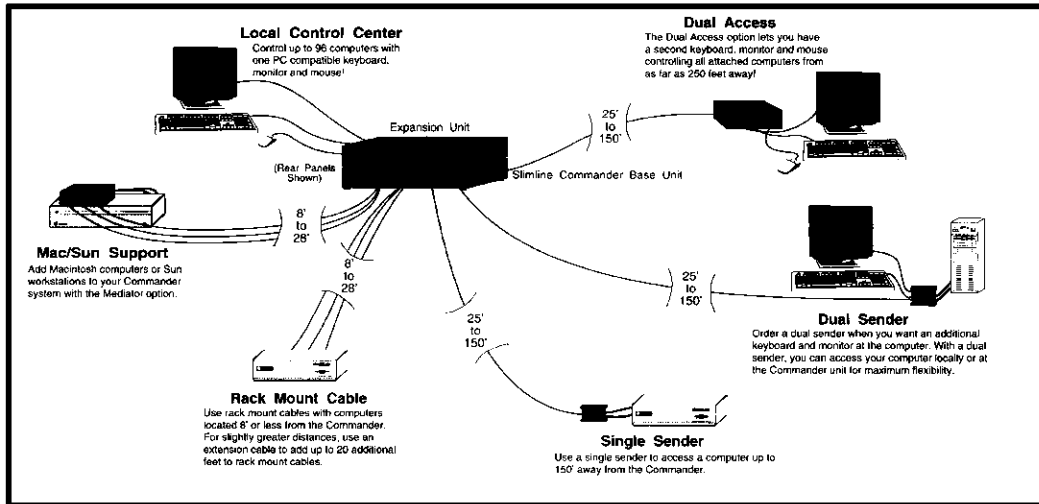

**Rack Mount Applications**
Optional hardware kits are available for 19-inch rack mount applications. These include integral cable support.

**Functional Diagram**

**Local Control Center**
Control up to 96 computers with one PC compatible keyboard, monitor and mouse!

**Dual Access**
The Dual Access option lets you have a second keyboard, monitor and mouse controlling all attached computers from as far as 250 feet away!

(Rear Panels Shown)

Slimline Commander Base Unit

**Mac/Sun Support**
Add Macintosh computers or Sun workstations to your Commander system with the Mediator option.

**Dual Sender**
Order a dual sender when you want an additional keyboard and monitor at the computer. With a dual sender, you can access your computer locally or at the Commander unit for maximum flexibility.

**Rack Mount Cable**
Use rack mount cables with computers located 8' or less from the Commander. For slightly greater distances, use an extension cable to add up to 20 additional feet to rack mount cables.

**Single Sender**
Use a single sender to access a computer up to 150' away from the Commander.
