

DaynaPORT *BlueStreak* 10/100 PDS Adapter

DaynaPORT BlueStreak 10/100 PDS adapters connect all Macintosh and Macintosh-compatible computers with a PDS slot to either 10BASE-T or 100BASE-TX networks.

FEATURES:

- 100BASE-TX or 10BASE-T operation
- NWayTM support for auto-negotiation
- SMC Ethernet controller
- Uses Category 5 cable
- Made in the U.S.A.

BENEFITS:

- 100 Mbps bandwidth
- Easy migration path with NWayTM support
- Lifetime warranty for peace of mind

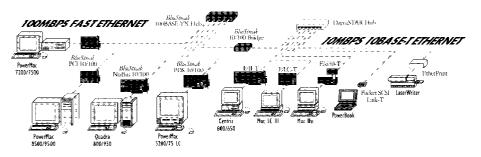

The DaynaPORT *BlueStreak* 10/100 PDS adapter is part of Dayna's *BlueStreak* family of Fast Ethernet products. The *BlueStreak* PDS adapter provides high-performance 10 Mbps or 100 Mbps operation, allowing users to take advantage of their network's full capabilities.

BlueStreak 10/100 PDS adapters combine both flexibility and functionality in one high-performance adapter. BlueStreak adapters run at either 10 Mbps or 100 Mbps speed from a single RJ-45 jack. Using NWay™ support for auto-negotiation, the BlueStreak 10/100 PDS adapter automatically senses and configures to the speed of the network. This feature means users can buy the BlueStreak PDS card for use with a 10BASE-T network today, and still have the flexibility to

upgrade to 100BASE-T in the future. To upgrade, simply connect to a 100BASE-T hub; the *BlueStreak* PDS adapter automatically senses the network speed change and reconfigures itself.

Diagnostic LEDs provide easy-to-read status on Activity, Link Integrity, Network Speed, and Full- or Half-Duplex mode. *BlueStreak* adapters work with Apple's System 7.0.1 or later and are compliant with IEEE 802.3 10BASE-T and 802.3u 100BASE-TX standards. *BlueStreak* adapters also work with all popular network operating systems, including AppleShare, NetWare, TCP/IP.

All DaynaPORT adapters are backed by free technical support and a lifetime warranty.

BlueStreak 10/100 PDS Adapter

System Requirements

DaynaPORT BlueStreak PDS adapters require:

- Macintosh or Macintosh-compatible computer with a PDS slot
- 10BASE-T Ethernet network or 100BASE-T Ethernet network
- System 7.0.1 or later

Compatibilities

Cable Systems Supported—Two-pair Category 5 UTP for 100BASE-TX; Category 3,4, or 5 for 10BASE-T

Protocols Supported—AppleTalk Phase 2; TCP/IP; IPX

Macintosh System Supported—System 7.0.1

Operating Systems Supported—AppleShare; NetWare; Banyan VINES; Pathworks NWayTM support for auto-negotiation between 10BASE-T or 100BASE-T

Network Speed

10 Mbps or 100 Mbps in half-duplex mode

20 Mbps or 200 Mbps in full-duplex mode

Certification

FCC Class A

IEEE 802.3u compliant

Connectors

One RJ-45 connector for 10BASE-T or 100BASE-TX operation

Package Contents

DaynaPORT BlueStreak 10/100 BASE-T PDS Adapter Card
