

Redefining the OCR Industry!

Thanks to our formidable competitors, OCR technology has gained greater recognition and importance in the last decade. With the growing number of scanners in corporate and SOHO markets, you need the most advanced recognition software to truly benefit from your hardware investment.

In fact, Optical Character Recognition software is an important technology to complement fax/modems and multi-function devices, as it allows you to gain storage advantages when converting images to text.

With a variety of images you need a **variety of OCRs**. To ensure superb text preservation under different conditions, you need **different OCR engines**.

NeuroTalker™ OCR, Winner of the 1996 Imaging Magazine Product of the Year, delivers excellent recognition on **complex images**. Our **Genetically-Enhanced Neural Network Technology** gives you the best price/performance ratio that redefines the OCR industry!

Yes, those other OCR engines are good.....and We are Too! Remember, in many cases it is the OCR that drives the scanner not the other way around. Try us on a variety of text images with or without context and see the difference!

OCR for Life™

INM's exclusive OCR for Life™ program, makes investments in OCR last longer with Free software performance upgrades over the Internet.

The revolutionary software you have been waiting for

- INM is a leading provider of neural network/pattern recognition based technology in the areas of Imaging, Speech, Financial, Medical.
- INM currently supplies neural network/pattern recognition based technology to a number of clients across North America and Europe.
- Canadian developed technology with international appeal.
- Worldwide distribution channels
- Premier supplier of packaged software for the SOHO and reseller channels.

Neurotalker™ software is INM's first group of commercial products in the areas of Imaging and Speech. Neurotalker's™ product line includes optical character recognition (OCR), speech synthesis, speech recognition and text to speech conversion. In OEM markets, selling activities are focused on working with innovative hardware or system vendors who are interested in incorporating INM's OCR technology into next generation products. INM is interested in collaborating with manufacturers, vendors and users of electronic image management systems, scanners and fax machines.

The OCR market is an integral part of the document management/workflow area, with recognition of text vital to the growth of electronic conversion and paper management.

With the growth of the small and medium sized business, SOHO (small-office/home office) there will be an increased demand for tools to help these people automate the paper trail.

OCR will be integrated into other office functions, such as storing and indexing incoming faxes and other paper documents. The convenience of automated storage and search will help drive demand and interest for OCR.

NEUROTalker™ OCR Advantage

- Neural network/pattern recognition technology
- Not dependent on spell checkers
- Superior price/performance
- Production type OCR
- Runs under DOS, Windows NT, Windows 95, Windows 3.1
- Seamless integration into other applications
 - Visual C++, Visual Basic
- Integral part of
 - Document imaging
 - Work Flow
 - Document management
- Resets the price point for a quality OCR product with full performance capabilities
- Unique batch mode/command line execution under Windows and DOS
- Superior performance on real world documents:
 - speed, robustness, fidelity and productivity features
- OCR for Life™
 - Free download of performance enhancements from the Internet
- Easy to install and operate
 - Preserving customer's computing environment
