

Intel LANDesk® Server Manager Products

Because server uptime is the only choice

Intel LANDesk® Server Manager products provide busy network administrators with a proactive management solution and emergency-management recovery tools to help maximize business-critical server uptime. From a centralized console, Intel LANDesk Server Manager products monitor critical parameters on either Microsoft Windows NT* or Novell NetWare* servers. Through enhanced alerting features and server health monitoring, Intel LANDesk Server Manager products notify the LAN administrator when a server reaches a predefined threshold.

Proactive management of servers is a critical element for businesses that must manage a 7-day, 24-hour computing environment. For those businesses that are also distributed across several locations, a remote management and emergency recovery solution is also vital. The Intel LANDesk Server Manager product line includes a comprehensive hardware/software solution that allows for both proactive and emergency management practices, as well as a software-only version for smaller, more centralized networks.

Intel LANDesk® Server Manager Software	Intel LANDesk Server Manager Pro
<ul style="list-style-type: none">▪ <i>Software-only solution, ideal for smaller or centralized networks</i>▪ <i>Real-time server health monitoring and alerting</i>▪ <i>Supports both Windows NT* and NetWare* operating systems</i>▪ <i>Ongoing data collection to help determine baseline and trends</i>▪ <i>SNMP trap alerting for integration with enterprise management console</i>▪ <i>DMI instrumentation monitoring and alerting</i>▪ <i>Server health reporting</i>▪ <i>Server console remote control</i>	<ul style="list-style-type: none">▪ <i>All the features of Intel LANDesk Server Manager Software plus:</i><ul style="list-style-type: none">– <i>Hardware/software solution, ideal for 7 x 24 and distributed environments</i>– <i>Full remote control, reset, and restoration</i>– <i>PC vendor-independent management for Intel Architecture (IA) based servers</i>– <i>ISA board with internal and external temperature probes</i>– <i>Battery back-up so you have access to the server even if power is down</i>

Intel LANDesk® Server Manager Pro v3.0

Full-featured remote control and management

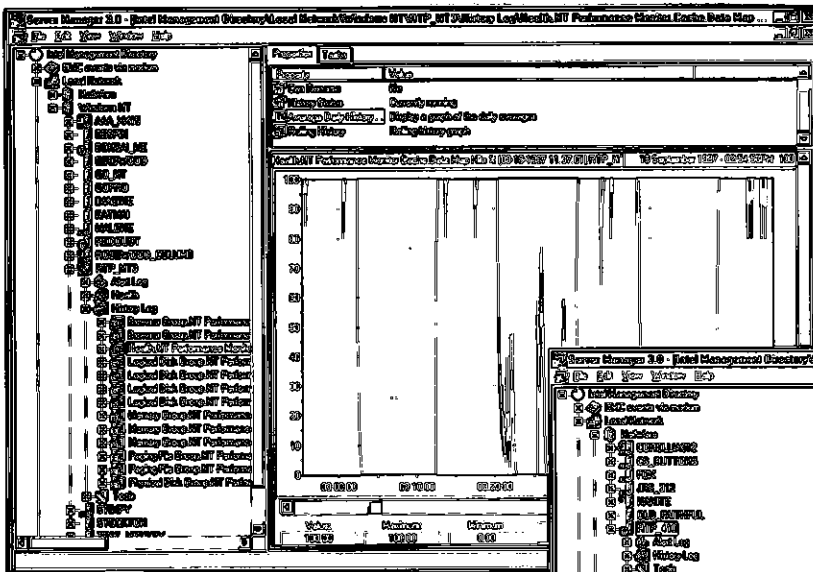

KEY FEATURES

- Full-featured remote control, reset and restoration of Intel Architecture PC servers
- PC vendor-independent support for Novell NetWare* and Microsoft Windows NT* servers
- Proactive server monitoring and management for distributed and 7x24 environments

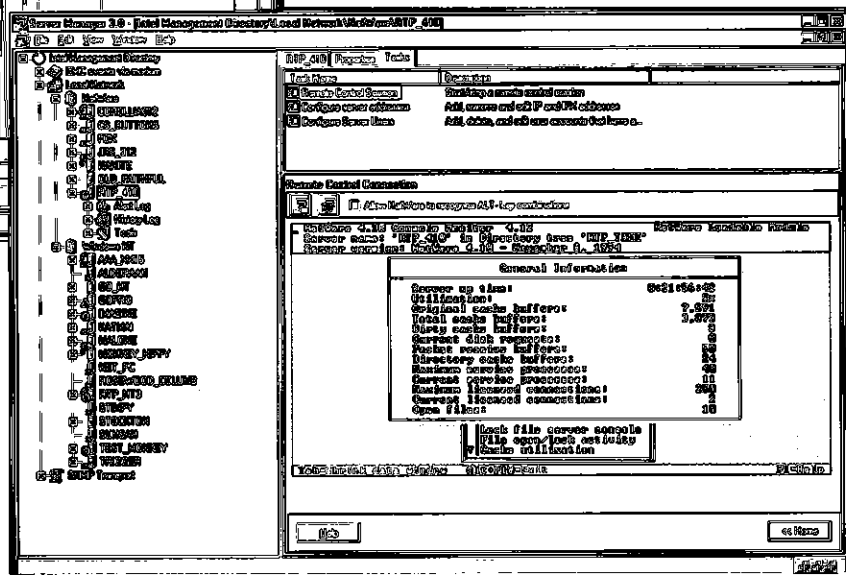

Intel LANDesk® Server Manager Pro keeps critical servers up and running with comprehensive crisis-averting server management. Offering an extensive set of control and monitoring capabilities, Intel LANDesk Server Manager Pro provides computer-within-computer technology that monitors your servers around-the-clock. Full out-of-band remote control lets you view your Novell NetWare and Windows NT server screens – no matter where your servers are located – and quickly diagnose and fix problems before they become serious.

- Out-of-band remote control enables fast restoration of business-critical servers

- Supports both Windows NT and NetWare operating platforms for maximum flexibility and operating efficiency
- Alerting of both critical and non-critical events, with notification by pager, email, or pop-up messages on the management console
- Continuous memory loop records up to 2K of most recent server activity and provides valuable data when troubleshooting a downed server
- Monitors server hardware and network operating system performance, including disk space consumption, processor utilization, cache memory availability, server temperatures and voltage levels
- Intelligent power module for power cycling of your servers (110v or 220v)
- Temperature and voltage metering to continuously monitor your server for adverse environmental conditions
- SNMP trap alerting for integration with your enterprise management console

Clear graphs help you monitor the health of your server hardware, and provide valuable performance data for quick trouble-shooting of server problems.

Take complete remote control of your server with Intel LANDesk® Server Manager Pro – even if your server has crashed or abended.

Intel LANDesk® Server Manager Products

INTEL LANDESK® SERVER MANAGER PRO PACKAGE INCLUDES:

EMERGENCY MANAGEMENT CARD

ISA board (EISA setup included)
 Internal and external temperature probes
 Battery backup
 Server reset connector
 Intelligent Power Module (110v for North America only or 220v version available)
 Direct power cycling support for compatible servers
 PCMCIA or serial port for modem support

MANAGEMENT SOFTWARE

Novell NetWare® 3.12 and 4.X agent monitors
 150 NetWare parameters
 Microsoft Windows NT® Server 3.51 and 4.0 agent monitors
 250+ parameters
 Server Monitor Module agent for temperature, voltage, etc., via hardware module

RECOMMENDED OPTIONS

PC card (PCMCIA) or external modem for remotely accessing management hardware (2400-56,000 baud)

SYSTEM REQUIREMENTS

EMERGENCY MANAGEMENT CARD

NetWare 3.12 or 4.X server
 – Intel486™ or Pentium® processor-based server
 – 12MB of RAM
 – 30MB of available disk space

Windows NT Server 3.51 or 4.0

– Intel486 or Pentium processor-based server
 – 24MB of RAM
 – 15MB of available disk space

MANAGEMENT CONSOLE

Windows® Console
 – Microsoft Windows 95
 – Intel486 or Pentium processor-based PC
 – 12MB of RAM
 – 10MB of available disk space

Windows NT Console:

– Windows NT Server or Workstation v3.51 or 4.0
 – Intel486 or Pentium processor-based PC
 – 16MB of RAM
 – 10MB of available disk space

INTEL LANDESK SERVER MANAGER SOFTWARE INCLUDES:

MANAGEMENT SOFTWARE

- Novell NetWare 3.12 and 4.X agent monitors
 150 NetWare parameters
- Microsoft Windows NT Server 3.51 and 4.0 agent monitors
 250+ parameters

SYSTEM REQUIREMENTS

MANAGEMENT CONSOLE

Windows Console
 – Microsoft Windows 95
 – Intel486 or Pentium processor-based PC
 – 12MB of RAM
 – 10MB of available disk space

Windows NT Console

– Windows NT Server or Workstation 4.0
 – Intel486 or Pentium processor-based PC
 – 16MB of RAM
 – 10MB of available disk space

COMPANION PRODUCTS

Consider these related Intel products as a factor in your network planning.

- Intel LANDesk® Management Suite
- Intel LANDesk Configuration Manager
- Intel LANDesk Virus Protect

CUSTOMER SUPPORT

Intel Customer Support Services offers a broad selection of programs including extended phone support, upgrades, parts replacement, on-site services and installation. For more information, contact us on the World Wide Web at <http://support.intel.com> or call 800-538-3373, ext. 276. Service and availability may vary by country.
