

Intel InBusiness™ Fast Hubs

- Helpful Status Lights and Power Button
- CableKeeper Cable Ring
- Stack and Connect with SureStack™ Design
- Limited Lifetime Warranty

Intel InBusiness™ Fast Hubs are perfect for creating or expanding a high-performance network. Designed for users who transfer large files, use databases and multi-media applications, or

who otherwise burden their network, Fast Ethernet is the ideal solution for today's demanding network needs. Intel InBusiness hubs are part of Intel's complete line of products designed specifically for small networks.

Fast Ethernet Performance

Fast Ethernet, or 100BASE-T, is up to ten times faster than standard Ethernet. A Fast Ethernet hub is the central device in any high-performance network.

Plug and Play Installation

Intel InBusiness hubs are plug and play, making installation a breeze. Basic port labeling makes it easy to identify and make proper connections to each device.

Unique SureStack™ Design

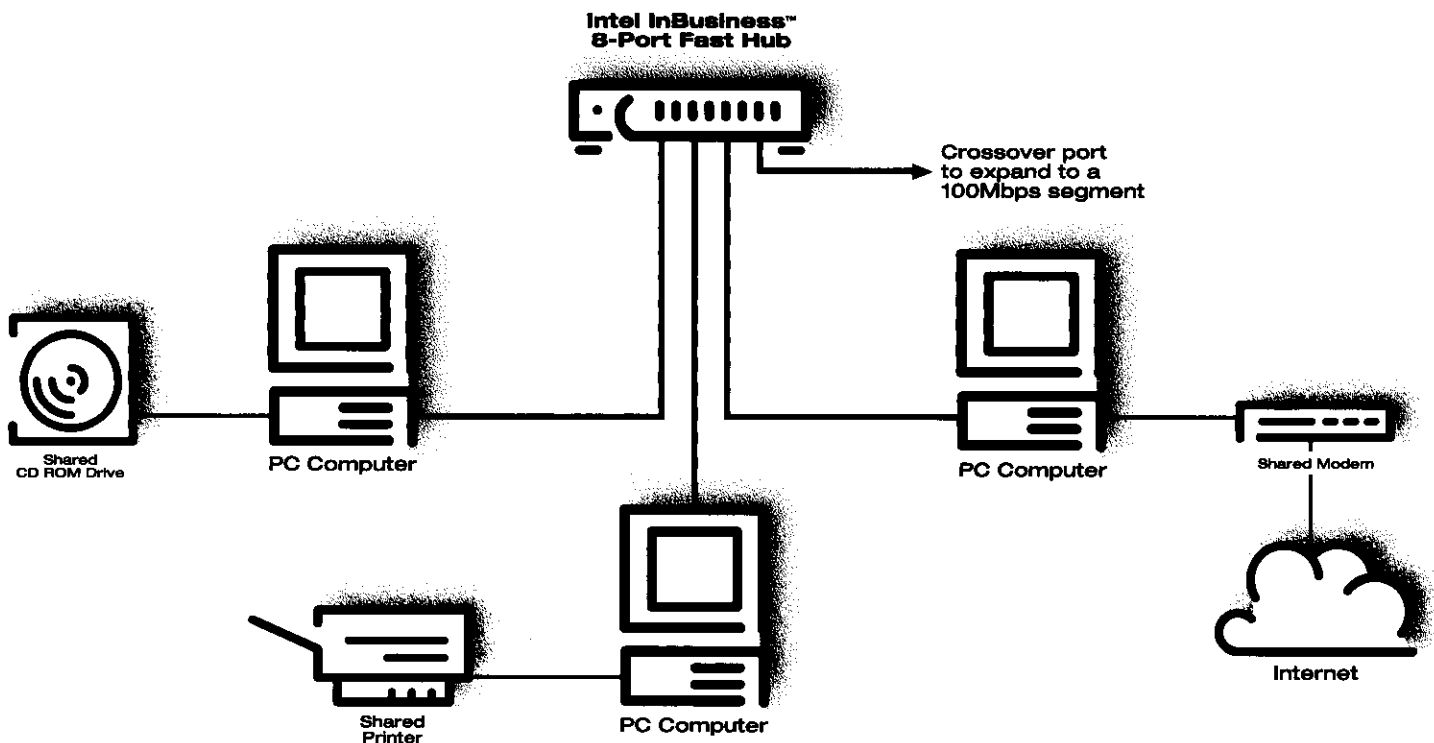

Intel InBusiness products have a unique, compact form perfect for offices with limited space. SureStack locking connectors allow you to integrate additional InBusiness products in a single attractive stack that can be placed horizontally or vertically, or even mounted on a wall, saving valuable space for other equipment.

Additional Ports For Network Expansion

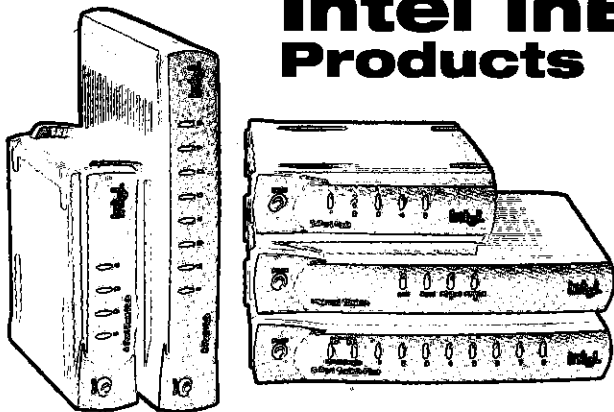

A special port, called a "crossover" port, allows you to connect Intel InBusiness hubs to other hubs without special wiring. Add additional ports as your network grows by stacking and connecting hubs with this special port. The Hub Plus includes an additional 10/100 port for connecting to an existing 10BASE-T network, or to another Fast hub or server. This auto-sensing port automatically detects the speed of the connected device. No configuration is needed.

Create a Simple Network with an Intel InBusiness™ Fast Hub!

Intel InBusiness™ Products

Intel InBusiness networking products provide everything that small networks need to easily share resources and increase productivity. Designed specifically for small networks, Intel InBusiness products are your simple networking solution.

SPECIFICATIONS

O/S SUPPORT	Windows® 95, Windows NT®, Windows for Workgroups®, DOS, Microsoft LAN Manager®, IntraNetWare®, Artisoft LANtastic®, Mac® OS
CABLING SUPPORT	Category 3 or 5 for 10BASE-T ports Category 5 for 100mb and 10/100mb ports
NETWORK SPEED	10 or 100Mbps
CONNECTORS	(4 or 8) RJ-45 100mb, (1) Crossover RJ-45 100mb, (1) 10/100 auto-sensing RJ45 (8-Port Plus model only)
STATUS LIGHTS	Power, Port Link/Activity, Bridge Link/Activity, Bridge Speed 10 or 100Mbps (Plus model only)
WARRANTY	Limited Lifetime
