

# Intel InBusiness™ Hubs

- **Helpful Status Lights and Power Button**
- **CableKeeper Cable Ring**
- **Stack and Connect with SureStack™ Design**
- **Limited Lifetime Warranty**

Intel InBusiness™ Hubs are designed so you can easily create your own small network or expand an existing network in minutes. Designed to be small enough for the desktop, they are the perfect solution for sharing devices and other resources. Intel

InBusiness hubs are part of a complete line of products designed specifically for small networks.

## Ethernet Connectivity

→ 10BASE-T Ethernet, or standard Ethernet, is not only simple to install and troubleshoot, but is the most logical and economical choice for most basic network installations.

## Plug and Play Installation

→ Intel InBusiness hubs are plug and play, making installation a breeze. Basic port labeling makes it easy to identify and make proper connections to each device.

## Unique SureStack™ Design

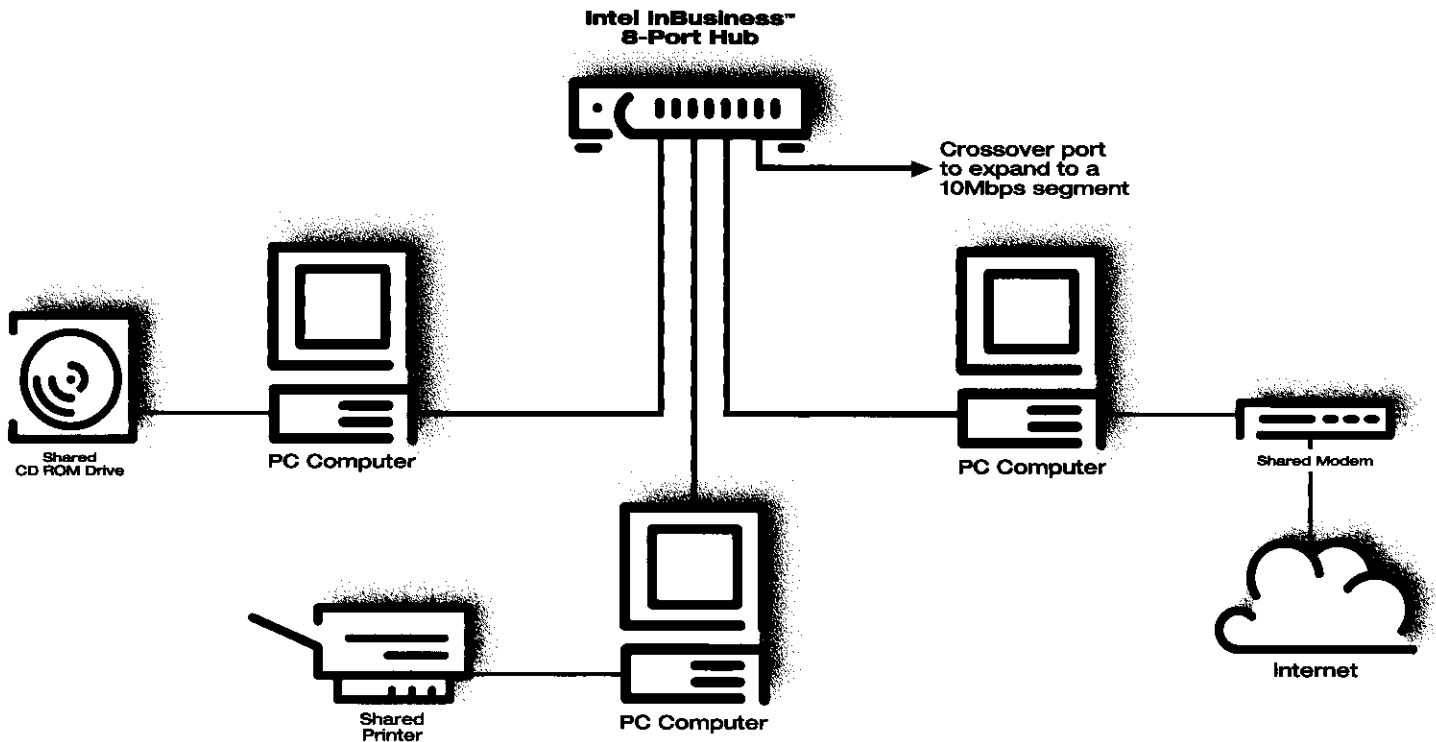

→ Intel InBusiness products have a unique, compact form perfect for offices with limited space. SureStack locking connectors allow you to integrate additional InBusiness products in a single attractive stack that can be placed horizontally or vertically, or even mounted on a wall, saving valuable space for other equipment.

## Additional Ports For Network Expansion

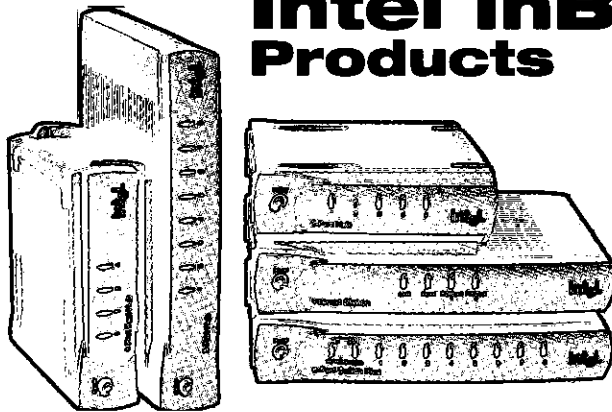

→ A special port, called a “crossover” port, allows you to connect Intel InBusiness hubs to other hubs without special wiring. Add additional hubs as your network grows by stacking and connecting them with this special port. A coax connector is also available on certain models if you wish to expand a current network by connecting to a coax backbone.
