

IntraNetics 97

THE COMPLETE INTRANET-IN-A-BOX

► **Out-of-the-box, ready-to-go.**

IntraNetics 97 is the world's first and only out-of-the-box, ready-to-go intranet for your business. Just open the box and install the software. In minutes, you'll have corporate-wide communications with 17 integrated powerful, yet easy-to-use business applications. And IntraNetics 97 does it all for a fraction of the cost of designing and implementing a corporate intranet.

Cost is no longer an obstacle.

Until now, companies that created and implemented corporate intranets (almost always large multinational corporations) spent at least \$100,000, and in many cases as much as \$250,000, to do so. With IntraNetics 97, all that has changed.

Open a box, and open a world of possibilities.

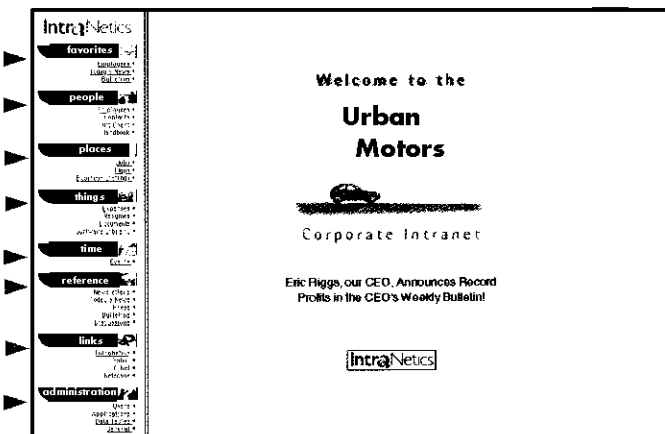

Whether yours is a company of 50 or 500 employees, you can put the power of the intranet to work enhancing communications and increasing productivity in short order: IntraNetics 97. The first and only complete intranet-in-a-box!

Applications: 17 and counting.

IntraNetics 97 includes 17 fully-featured intranet applications (with more coming in each release) that are out-of-the-box and ready-to-go! These integrated applications are organized neatly under five categories:

People, Places, Things, Time and Reference.

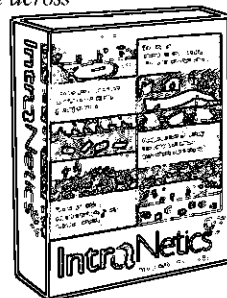

IntraNetics 97

Much like any web site 'home page', we provide a 'home page' which acts as a simple, yet elegant interface to five categories and the

applications under them. There are even 'hot links' to breaking news which needs to be communicated across the organization!
