

Affordable personal storage to organize, move and backup your stuff...

100
drive™
zip

...anywhere

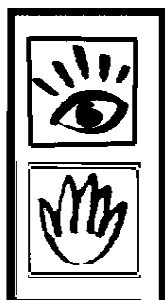

Three Uses In One Drive™:

Fast, easy backup and archiving of your important information

Removable disks let you move or share information anywhere

Expand your hard drive without limits, 100 MB at a time

NEW Zip Internal ATAPI 3.5" drive

Unlimited storage

The new SuperFloppy standard for the multimedia age

The new Zip internal ATAPI is the most affordable way to add the new 100MB emerging SuperFloppy standard to your PC.

- Provides high performance without the complication or expense of SCSI connections
- Connects to internal hard drive controller using standard IDE/ATAPI interface and internal power supply
- Fits inside 3.5" or 5.25" standard PC drive bay
- Comes with full suite of software applications for added value, to manage and backup your stuff

Holds the stuff you need for work or play

Great for things like multi-media, software applications, presentations, financial data, graphics, music, scans, spreadsheets and games. Your perfect companion as you travel the information superhighway.

Portable Files

Helpful software

Zip tools helps you organize, track and find all your stuff quickly and easily. It will catalog all your files on all your Zip disks. Zip tools provides useful software to help you manage your information.

Fast, easy and familiar

Zip drive works like your hard drive. You already know how to use it. Launch and run files and applications directly from the drive.

Fast, easy backup

Internal Solution

The new Zip internal ATAPI 3.5" drive provides all the benefits of Zip without the clutter of external solutions.

Expand your hard drive without limits

Increase your storage quickly, easily and economically – 100 megabytes at a time! You can even use different disks to categorize your stuff.

Zip Internal ATAPI IDE 3.5" drive
