A COMPLETE SOLUTION

- **12 Business** Applications. **Includes a dozen business applications you can tailor to maximize efficiency and promote steady business growth.**

- **Powerful** Web Server **Proven, secure Lotus Domino is the open standards-based server for hosting Internet/intranet sites. Here, users can actually interact with information, not just read it.**

- Internet E-mail. **Provide internal, external, and mobile communication via SMTP and POP3 Internet protocols.**

- Client Options. **Choose to deploy popular Web browsers or powerful Notes clients.**

- Flexible Security. **Authorize who can create, edit, or just read site content thanks to password access and roles-based security.**

- **Customization Tool** Create internal **intranets and signature Web sites by adding company logos, photos, graphics, and more.**

- Data Access. **Leverage your investment in existing Web material. Plus, access ODBC™-compliant data from your company's database applications.**

Solutions for growing business— Domino Intranet Starter Pack delivers 12 applications that help you manage crucial information in record time.

As a growing business, you're probably eager to use the Web to tap new markets. Jack up efficiency. Speed communication. And cement relationships with customers and suppliers.

Lotus Domino Intranet Starter Pack™ helps you do just that. It provides everything your business needs to leverage the power of the Internet.

At the heart of the Domino Intranet Starter Pack are twelve ready-to-customize Web applications and the acclaimed Lotus Domino Web Server. These business solutions will help you track projects, contacts, orders, and documents; keep customers informed; and resolve problems without picking up the phone.

Create an intranet to share information, project status and online discussions with the entire organization. Attract and engage customers by creating a visually appealing company Web site. And establish enhanced, seamless communication throughout the organization using Internet e-mail and calendaring.

Domino Intranet Starter Pack supports Web browsers, a variety of mail clients and the award-winning Lotus Notes client giving you the flexibility to choose the best client for each user.

Ask your Value Added Reseller to customize the Domino Intranet Starter Pack for your business today. And start working the Web tomorrow.

12 Ready-to-Customize Business Applications.

Choose from the following applications. All can be tailored to fit your company. Add other applications business needs grow.

- **Document Library.** Make sure everyone in your organization has 24 hour access to new and existing business information, including policies and procedures, sales presentations, proposals, contracts, company logos, and more. Users can post documents to a central library anytime for others to share.

- **Employee Directory** Create a central online resource for up-to-date employee listings.

- **Company Forms.** Don't waste valuable time hunting down expense or travel forms. Create one-stopshopping for all administrativ "paperwork".

- **Discussion.** Give individuals and groups an easy and accessible way to share opinions and solve problems on various topics: projects, industry issues, product development, and more.

- **Project Management.** Make sure crucial details don't fall through the cracks. Manage projects and tasks more efficiently by formally tracking input from multiple sources.

- **Customer Tracking.** Improve customer service by collecting and tracking information on sales, order status, and account activity.

- **Contact Management.** Manage prospects, vendor and customer accounts more efficiently by keeping a detailed, chronological record of each business contact.

- **Home Page.** Create a personalized company Home Page to greet and orient site visitors.

- **Registration.** Register and track the patterns of Web site users. Learn what's hot and what's not on your site.

- **Product Catalog.** Provide detailed product or service information to prospects, customers, and salespeople, in an attractive, easy-to-read format.

- **Career Opportunities.** Reach qualified applicants and collect their resumes online.

- **F.A.Q.** Answer frequently-asked questions on your company, products or services. Point site visitors to other sources of information.

Start growing your business on the Web now.

- **Internet E-mail.** Essential communication for businesses that want to stay competitive. Domino Intranet Starter Pack features e-mail based on Internet standards SMTP and POP3, connecting your company to the world.

- **The Server That Won't Quit.** The Domino server gives your business a solid foundation for your Web presence — and enables you to upgrade to more sophisticated applications and features as your needs grow. Lotus Domino has already helped companies significantly enhance efficiency, improve relationships, and lower costs.

- **A Choice of Clients.** Domino Intranet Starter Pack supports popular Web browsers, POP3 mail and Lotus Notes clients. 5 client licenses are included. Choose Microsoft Internet Explorer.™ Or opt for Lotus Notes clients that enable users to be productive anywhere. An extensive range of features in Notes clients help users harness the vast pool of information available on the Web. And manage day-to-day operations more efficiently with calendar and scheduling features.

Pull it all together. Fast.

Domino Intranet Starter Pack enables your company to rollout a comprehensive business solution to your entire workforce in a matter of days.

- **It's Rapid.** Your Value Added Reseller can install and configure Domino Intranet Starter Pack services quickly. Once the applications are configured, anyone with a Web browser can create, edit and maintain their own Web site and intranet content.

- **It's Easy-to-Use.** Even if it's your first time online, you can access and manipulate the information in the Domino Intranet Starter Pack applications. Just point and click and fill in the blanks. For example, users with authorization can update Directory listings on the fly. No HTML knowledge is required.

- **It's Cost-Effective.** Domino Intranet Starter Pack delivers custom applications without expensive programming. And your VAR can perform many routine administrative tasks online.

- **It's Secure.** Domino Intranet Starter Pack gives you complete control over who can access your valuable business information. Assign access privileges, as to who can create information, edit it, or read only. You can even shut out users from seeing specific sets of documents. Tough controls allow you to extend your intranet safely to those outside your company.

- **It's Compatible.** Users can pull in existing data, such as employee listings or product pricing, from Web pages or ODBC™-compliant databases, including Microsoft Access,® dBase,® and FoxPro.® And Domino Intranet Starter Pack connects to the printer systems you have in place.

- **It'll Grow on You.** As your needs grow, it's easy to add specialized Domino business applications and support additional users.
