- **Enjoy Immediate Results.** Use Weblicator's fun graphical user interface, and getting started is a breeze!

Lotus Weblicator™ adds breakthrough Web information management capabilities to your browser – even when you're not connected to the Net.

Revolutionize the Way You Manage and Work with Web Pages

When it comes to making the Internet work for you, having a connection and browsing the Web is just the beginning. What if you could quickly surf through your favorite Web pages at your convenience, with no network slowdowns? What if you could be disconnected from the Net and actually work with applications on the Internet or your corporate intranet when you're on the road or in a plane? To fully leverage the power of your favorite Internet applications, at your convenience, you need the ability to manage and work with Web content with or without a connection to the Net.

With Lotus Weblicator, you can copy your favorite Web pages to your own computer's hard drive and then go offline and work with those pages just as if you were connected to the Net, only faster. Because you're working from your hard drive. You can fill out and submit forms offline, and Weblicator will automatically send them

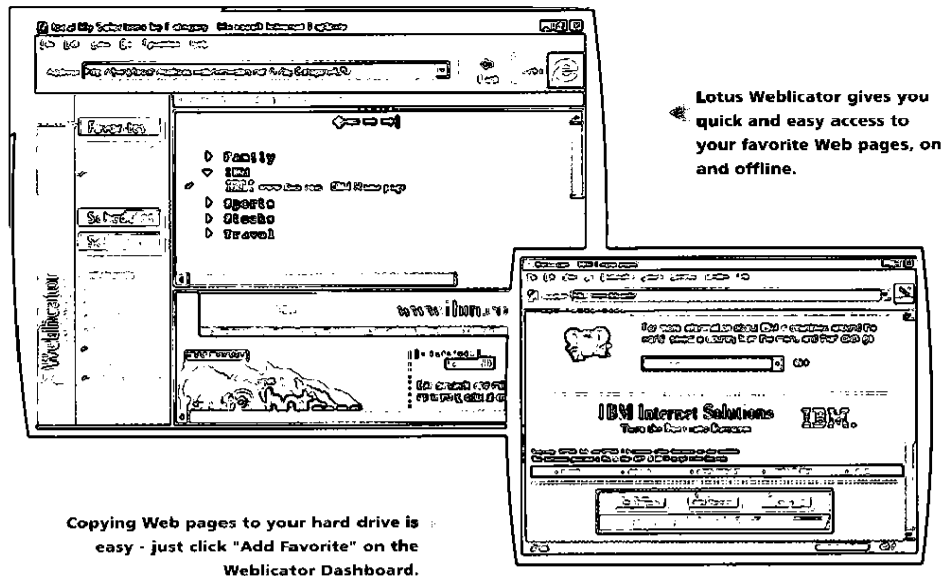

when you reconnect. So you're not just surfing offline, you're working offline.

Weblicator keeps your stored Web pages up to date by scheduling monitors to go online and search Web sites for new or changed information. Then it automatically updates your stored pages. With Weblicator, staying on top of new Web content is easy.

Work with Business Applications Offline

Weblicator can download critical Internet or intranet business applications – such as customer service, sales force automation, and HR tracking data – from any Web server, including Lotus Domino servers. So you can work with Web applications wherever you go. Browse customer profiles, review sales statistics or complete and submit orders offline. Whether you're flying over the ocean or presenting at a customer site, the Web information you need is always available, wherever and whenever you are.

FEATURES OVERVIEW

A Family of Powerful Internet/Intranet Applications

Weblicator is part of the Lotus family of Web products that are helping organizations worldwide automate their essential business processes via the Internet and corporate intranets.

Lotus Weblicator is an essential tool for any browser user who needs to efficiently find and manage information on the Web and then work with that information offline. Working with Weblicator is easy – it comes with a simple user interface, quick and easy dialog boxes and an online dashboard that lets you copy pages to your own computer with just a click. Let Weblicator Work the Web to ensure you have up to the minute information where and when you need it.

Improve Productivity –

During non-peak hours schedule Lotus Weblicator to automatically copy Web pages to your own computer's hard drive. Then go offline and browse favorite Web pages just as if you were connected to the Internet. But because you're working from your hard drive, you'll enjoy faster display times for text, graphics and animation, and avoid endless delays on busy sites.

Keep Information Up-to-Date –

Let Lotus Weblicator automatically monitor your favorite Web sites for new information. If a Web page changes, Weblicator will notify you and update the offline copy stored on your computer.

Work the Web Without a Connection to the Net –

Use Lotus Weblicator to copy Web forms, such as orders or search forms, to your own computer's hard drive, and fill out and submit them offline. Weblicator will store multiple form submissions offline and then automatically send them when you reconnect.

Easily Locate Web Pages –

Weblicator sorts offline copies of Web pages using easy-to-read views, so you can quickly find pages by name, URL, page size, or by categories you create. Weblicator even sorts pages by date so you can see the most current information first.

Find Information Fast –

Let Weblicator index offline copies of Web pages and then do full text searches on specific key words – so the information you need is always at your fingertips.

Quickly View Page Content –

Use Weblicator's preview pane to move between Web pages and quickly view the content of each page. Weblicator's three pane window lets you see a list of your favorite Web pages and preview them on the same screen.

Enjoy Immediate Results –

Lotus Weblicator is designed for browser users of all levels. And it comes pre-loaded with selected news, business, travel, and other popular Web pages, so getting started is a breeze.
