Audiophile Multimedia Kits with NetTalk from NewCom combine leading-edge multimedia and communications products with powerful software. The result is a suite of tools that makes using your computer fun, exciting and productive. On-line or off-line, the possibilities are virtually limitless. Explore the World Wide Web, subscribe to newsgroups, create your own music and sound effects, or experience the exploding world of multimedia.

The kit comes with a 32 PnP wavetable stereo sound card, 16X max CD-ROM drive, full range 20 Watt powered NC100 speakers, clip-on microphone, and a large selection of software.

NetTalk software makes exploring the Internet easy with 21 Internet-specific software titles and utilities including convenient on- and off-line web browsing, graphics conversion programs, e-mail, news group browsers, and on-line audio and video programs. With the included Internet Relay Chat™ software and electronic registration code, Internet users can hold real-time audio conversations with other Internet users.

The Internet Multimedia Kit with NetTalk delivers high quality sound from NewCom's wavetable stereo sound card. It's 1MB ROM creates sounds from real recordings of 128 different instruments. All the quality of audio CD's, games, and interactive titles come vibrantly alive on your desk. Mix several audio sources such as: CD audio, microphone and line inputs. Features include Full AdLib™, Sound Blaster™, Sound Blaster Pro™, and Windows Sound System™ compatibility.
