

[WebAccess] world wide internet
access to your GroupWise Universal Mailbox

With GroupWise WebAccess, your GroupWise Universal Mailbox is now as close as the nearest World Wide Web browser. GroupWise WebAccess makes GroupWise as pervasive as the Internet, letting you access vital information anytime, anyplace.

GroupWise™ WebAccess provides advanced messaging and collaborative services through any World Wide Web browser. GroupWise WebAccess combines the power of the Internet/Intranet with superior GroupWise collaborative computing tools, including E-mail, calendaring, group scheduling, task management, and voice mail integration—all within the GroupWise Universal Mailbox. GroupWise

WebAccess makes it easier to communicate and collaborate, to manage schedules and complete tasks, and to work more efficiently and effectively, unhampered by time and distance limitations.

UNIVERSAL ACCESS

With GroupWise WebAccess, the GroupWise client is implemented as a home page on the Internet or Intranet. To access GroupWise, you simply enter the home page URL, your mail ID, and your password from any HTML 1.0-compliant Web browser. Once in your Universal Mailbox, you have access to GroupWise functionality with the look and feel of the Internet browser you're using. (Because GroupWise WebAccess uses HTML documents to present information and because each browser may interpret HTML information differently than another, your browser dictates the way GroupWise functionality is presented.) You can take advantage of virtually all of the rich, integrated functionality in GroupWise—read and send mail, check your calendar, listen to voice mail, and view attachments, tasks, and notes.

GroupWise™

Novell®

Intranet users and remote/mobile users can work more efficiently than ever before, and online service providers can provide these same capabilities to their subscribers. WebAccess also promotes the use of under-powered workstations and heterogenous desktops. If it can run a Web browser, it can run GroupWise WebAccess.

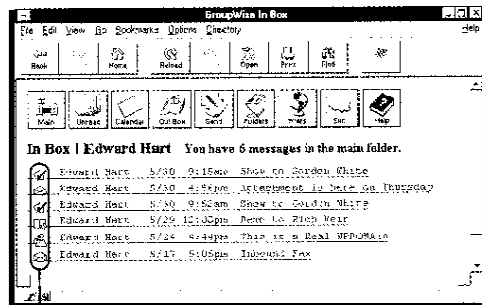

MORE THAN JUST E-MAIL

With GroupWise WebAccess, users can access most forms of communications they receive on a daily basis through the GroupWise Universal In Box. The rich store of information available on the Internet or Intranet can also be effortlessly linked to GroupWise E-mail, scheduling, and task management messages. All of the features listed below are available within a seamlessly-integrated point-and-click environment.

- **CALENDARING** *Keep track of personal appointments, tasks, and notes.*
- **GROUP SCHEDULING** *Schedule meetings and track whether invitations to meetings are accepted or declined.*
- **TASK MANAGEMENT** *Assign tasks to other GroupWise users and track the status of those tasks.*
- **ATTACHMENT VIEWING** *View text files and other MIME attachments.*
- **SCREEN CUSTOMIZATION** *Modify HTML source files to include graphics, company information, or links to other URLs on the Internet or Intranet. Also, extend calendar views and restrict or modify data delivery.*

GROUPWISE ADD-ON COMPONENTS

- **FAX INTEGRATION** *With GroupWise Fax Gateway send a message to any fax machine worldwide.*

World Wide access to all your messages, anytime, anyplace.

- **VOICE MAIL CAPABILITIES** *With GroupWise PhoneAccess listen to voice mail messages received in the GroupWise Universal In Box.*
- **PAGER INTEGRATION** *With GroupWise Pager Gateway send a message to a recipient with either a numeric or alpha numeric pager.*
- **INTERNET E-MAIL** *With GroupWise SMTP Gateway add Internet E-mail capabilities to the GroupWise WebAccess system.*

A ONE-BOX SOLUTION

Within a NetWare[®] 4 environment, GroupWise WebAccess, combined with the NetWare Web Server™ NetWare Loadable Module™ (NLM), gives you a one-box Web solution. In addition to providing access in a NetWare environment, GroupWise WebAccess is available for OS/2 and Unix HTTP server environments. All that users need to use GroupWise WebAccess is a GroupWise account, an Internet or Intranet connection, and a Web browser. IS managers will like GroupWise WebAccess because there are no desktop installation requirements. Everything can be installed on a single server. And it's easy to create customized screens for unique communication or promotional needs within the WebAccess system.

Pre-installation requirements:

- A GroupWise Domain and Post Office must exist
- A GroupWise Message Server must be installed (Sold separately)
- A supported http server must be installed (Sold separately)

GroupWise WebAccess CGI

(Supported Platforms)
