TruPhoto™

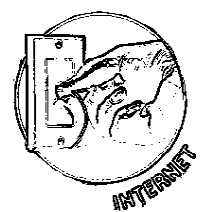

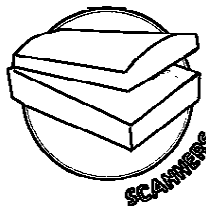

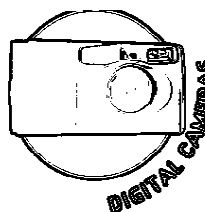

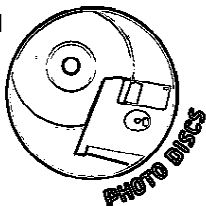

**TRUPHOTO™
DIGITAL PHOTO PRINTER**

Now you can enjoy the superb quality of real photographs right from your computer. Put your photos into your computer with a photo disc, digital camera, scanner or off the Internet. Use your graphics application program and the TruPhoto digital photo printer to get them out.

**REAL PHOTOGRAPHS FROM
YOUR COMPUTER**

Unlike ink jet color printers that just print a picture, TruPhoto produces a real photograph. That's because the crisp, vivid, color image is formed from elements inside the TruPhoto Thermo-Autochrome paper, just like any other color photo. And it all happens in under two minutes.
