

# DEFCON 1

## NOTEBOOK COMPUTER SECURITY SYSTEM

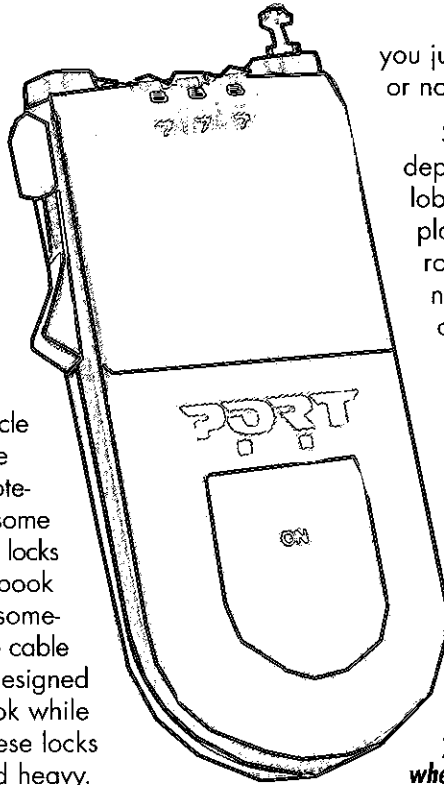

### An Exceptional Alarm To Deter Thieves.

*Just as protection is our top priority when it comes to carrying cases, we believe security should be your top priority when you're on the road. After all, an unsecured notebook is sometimes a missing notebook. And in 1995, 208,000 notebooks were stolen in the U.S. — almost 570 per day.*

DEFCON 1 is a versatile battery-powered anti-theft alarm system that protects your notebook in more locations and situations than any other device you can buy. And does it for a remarkably low price.

Most notebook locks are similar to bicycle locks: you pass a cable through a slot in the notebook, and secure it to some immovable object. These locks can't protect your notebook at all unless you have something secure to wrap the cable through. They are not designed to protect your notebook while it's in the case. And these locks are relatively bulky and heavy.

In contrast, DEFCON 1 guards your notebook anywhere, in or out of the case. DEFCON 1 consists of a sensitive motion detector, an LED that tells you — and everyone else — that the alarm is on, a very loud (110 dB) alarm, and a security cable. DEFCON 1 is compact, lightweight, and easy to use:

you just attach it to your case or notebook and turn it on.

So now you can relax in departure lines, restaurants, lobbies, and other public places. And in your hotel room, you can lock the notebook to an immovable object, use the motion detector, or both.

We can't make the world a safer place, but we can make your notebook safer wherever you are.

#### **DEFCON 1 is:**

*The first alarm that attaches directly to your carrying case and guards your notebook by sounding when someone tries to move the case.*

*The only alarm that sounds when someone tries to remove the notebook from its case. (The notebook lock slot must be in use for this adapter protection.)*

*The only alarm that sounds when someone cuts or disconnects the security cable.*

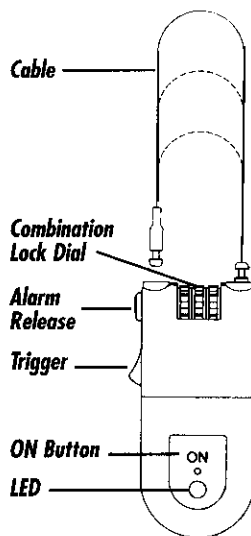

- Easily attaches to any case
- Adapter lock included for notebooks equipped with security slot
- Powered by 9-volt battery, up to 3 months between replacements
- Lock has 1000 user settable combinations
- Flashing LED lets everyone know your notebook is protected; "chirps" warning of excessive movement before alarm sounds

Essential Accessories For Portable Computers

**WEIGHT:** 6.4 oz. (battery installed)

**PART #:** SEL0400

**Protects your notebook in any setting!**

# FEATURES AND SPECIFICATIONS

## LOCKING - ELECTRONIC ALARM SYSTEM

In this mode of operation the DEFCON 1 can be used to secure items to immovable objects. If the cable is tampered with, the DEFCON 1 will sound an immediate and continuous alarm.

## USING THE MOTION SENSOR

DEFCON 1 is equipped with a highly sensitive Motion Sensor which can be activated whenever the unit is locked. Can't find an immovable object around which to wrap the cable? Simply lock the DEFCON 1 through one of the solid metal loops on your carrying case and set the sensor. Any motion will trigger the piercing alarm. Ideal for restaurants, lobbies and airport terminals.

## USING THE DEFCON 1 SLA (SECURITY LOCK ADAPTER)

Your DEFCON 1 comes with a special adapter which will allow you to secure your notebook computer equipped with a security lock slot. The cable is long enough for you to simultaneously lock your computer AND carrying case.

## Stainless steel cable lock system:

- Cut-resistant cable:  
Diameter - 1.6mm  
Length - 1.4 meters (4.7 feet)
- Vinyl coated
- Self-retracting

## Electronic Alarm System

- 110 dB Alarm Siren
- Automatically arms whenever lock is engaged
- Siren activated when...
  - Cable is severed
  - Motion Sensor is armed and triggered
  - Lock Combination required to deactivate

## User-Activated Motion Sensor...

Triggered when device is moved, shaken or tilted. Upon detecting motion, 3 Chirps warn of excessive movement.

- 4 seconds after detection:  
Alarm siren sounds for 40 seconds
- Automatically resets to "Armed" status

## Resettable 3-digit Combination

- Controls Lock, Electronic Alarm System and Motion Sensor
- 1000 unique combinations available
- Locks battery compartment

## LED Indicator Light

Warns thieves of armed device, Indicates alarm status

- "Passive Armed":  
Single Flash every 3 seconds
- "Motion Sensor On/Arming":  
9 seconds of Rapid Flashing
- "Motion Sensor Armed":  
Single Flash every 5 seconds
- "Motion Sensor Triggered":  
5 seconds of Slow Flashing

## Audible Indicators

- Advises user of DEFCON 1 status
- "Passive Armed":  
1 mechanical "click" and 1 electronic beep when cable plugged-in
- "Motion Sensor On/Arming": 2 beeps
- "Motion Sensor Triggered": 3 beeps precede alarm siren by 4 seconds

## Power: Conventional 9-volt Battery

- Operating Voltage:  
Minimum - 2.5 Volts  
Maximum - 9.0 Volts
- Power Consumption:  
Armed: < 0.2 mA  
Alarm: < 150.0 mA
- Battery Door cannot be removed when Lock is activated
- Battery Life - Continuous use (Lock connected/alarm "off"):  
Standard Battery - 70 days  
Alkaline Battery - 90 Days
- DEFCON 1 Security Lock Adapter for Notebook Security Lock Slot

## DEFCON 1 Security Lock Adapter for Notebook Security Lock Slot

Rugged, High Impact Plastic Housing

Weather Resistant
