# THE WALL

### Product Description

The extent of Internet access control is a matter of choice. WebNOT, from Raptor Systems, is the only firewall-integrated solution which permits you to manage the Internet access which is best for you and your organization.

- Block access to specific Internet resources and sites by content through the management interface (using the CyberNOT Block List, a listing of pre-scanned Internet sites containing potentially objectionable material).
- Block or allow specific categories of Internet resources and sites according to your own preferences by modifying the use of the CyberNOT List.

The CyberNOT Block List is a listing of researched Internet sites containing potentially objectionable material. Using the CyberNOT List, companies can reinforce their own corporate policies concerning access to specific URLs. This means that appropriate material at an Internet Web server need not be blocked due to the presence of restricted material elsewhere at the address. Security administrators may select all or any of the categories to be blocked.

Security administrators can select the categories of content that they wish to block and can allow access to any site on the CyberNOT List which they deem appropriate. The CyberNOT List is updated daily and is automatically downloaded via the WebNOT software.

### The CyberNOT List of Content Categories

*Criteria for categories: any on-line content that contains more than 3 instances in 100 messages from these categories.*

*Violence/Profanity (graphics or text)*

*Partial Nudity*

*Full Nudity*

*Sexual Acts (graphic or text)*

*Gross Depictions (graphic or text)*

*Intolerance (graphics or text)*

*Satanic/Cult (graphics or text)*

*Drugs/Drug Culture (graphics or text)*

*Militant/Extremist (graphics or text)*

*Sex Education (graphics or text)*

*Questionable/Illegal & Gambling  
(graphics or text)*

*Alcohol & Tobacco (graphics or text)*

Access to sports sites and search engines can also be restricted

**Note:** Scanned research is in the following languages: English, German, French, Russian, Hebrew, Spanish and Japanese.

### **Product Usage**

URL blocking on THE WALL is enabled by purchasing and activating the WebNOT subscription. CyberNOT updates the master list weekly. WebNOT reviews this list daily and downloads the new file if it's more current than what exists on THE WALL.

### **Configuration Information**

The WebNOT subscription can be purchased with THE WALL.

### **Ordering Information**

WebNOT can be ordered with or after purchasing THE WALL.

### **For More Information**
