TRANSFORM YOUR DIGITAL PICTURES
INTO DAZZLING PRINTS

Take your digital pictures from disc to paper using the Ricoh RXP-10 photo printer—simply, quickly and with vivid results. You can print directly from your Ricoh digital camera or from your desktop, with output that looks and feels like that produced from professional printing labs.

The Ricoh RXP-10 photo printer provides intense, photographic-quality prints that replicate the brilliant clarity of images seen on your computer's screen. And printing is fast: each print is delivered in about 90 seconds—dry and ready to use.

Another solid advantage is that every print costs the same as the first, and each one will have the same, consistent quality.

Installation is easy: the RXP-10 comes with standard interfaces for Windows PCs or Macintosh computers.

If you want to produce impressive prints from your digital images, this small printer is the best and most pleasing—investment you could make.

Features

► **Crisp, sharp results**

► **Easy-to-use**

► **Low cost per print**

► **Compatible with Windows or Macintosh computers**

Where to Buy

Ask for the Ricoh brand at your local computer, office, or retail outlets. Ricoh provides a full range of digital cameras, CD-RW drives for storing images, and media. When you choose Ricoh, you choose the leader in digital imaging products.

Printer Driver System Requirements

Windows
- 486/66 MHz processor or higher
- Microsoft Windows 3.1 or 95
- 16 MB RAM

Macintosh
- Power Macintosh or Macintosh with 33 MHz processor or higher
- Macintosh OS 7.0 or higher
- 3 MB of RAM for printer driver
- Macintosh QuickDraw output supported (cannot support System 7.5 QuickDraw GX output)

Supplies

Choose from either standard print paper (50 sheets) or cut adhesive print paper (50 sheets) for your photographic needs. Standard print paper provides a rich, glossy print. Pre-cut adhesive paper provides small adhesive images for adding decorative touches to mailings or other uses.

## Shipping Information

RXP-10 photo printer; Ricoh digital camera direct-connection cable; device-driver software for Windows 3.1, 95 and Macintosh; trial paper kit (25 sheets standard paper and one ink-ribbon cassette); operation manual and warranty card.
