56

MODEM SERIES

TWICE AS FAST WITH 56 KBPS!

Explore your favorite Web sites up to twice as fast as you would with a 28.8 modem! Online services are joining the 56K revolution and so should you! If you've been on the Internet, you know... faster isn't just better, it's the difference between surfing and standing still!

- The perfect choice for exploring the Internet
- Downloads large graphics and multimedia from the Internet in a fraction of the time
- Dramatically reduces access time and fees

THE FASTEST FAX SPEEDS AVAILABLE

- Fax a document directly from your Windows™ or Macintosh™ application – it's as easy as printing.
- Send your fax to any standard fax machine or faxmodem.
- Schedule broadcast of faxes when rates are lowest.
- Send and receive faxes in the background without interrupting your current work session.
- Compatible with Class 1 fax software (included in package) and Group 3 fax devices.

VIDEO-PHONE READY (V.80)

The future's here! The SupraExpress 56 series offers V.80 technology - the new modem standard which brings video-phone capabilities to your PC or Mac! Imagine talking to friends and family over a standard phone line while seeing them on your monitor. Plus, browse video clips directly from Web pages - no more downloading hassles.

PC: Requires sound card, video capture card, digital video camera, Windows 95 and video-phone software.

Mac: Requires video capture card, digital video camera, and video-phone software.

BUILT TO LAST

The SupraExpress 56 series is software upgradeable so you're assured of the most current modem technology. Plus it's backed by a 5-year warranty. Technical assistance is available via phone, 24-hour BBS, online forums, e-mail and Web site.

SYSTEM REQUIREMENTS

Windows: An IBM-compatible computer (386 or higher), Microsoft Windows (3.1, 3.11), Windows 95. AT bus, ISA required for internal version.

Macintosh: Desktop Macintosh with 68020 or greater, System 7.1 or greater, 4 MB RAM, 6 MB free hard disk space required. Macintosh AV and PowerMac™ compatible.

BACKWARDS COMPATIBLE

The SupraExpress 56 series supports V.34 for the highest data speeds available between modems. Plus, it supports all existing ITU modem standards so you won't have to worry about compatibility with slower modems.

- V.34 and V.42bis support for throughput to 115.2 Kbps
- Quickly transfers large multimedia files
- Provides fast remote access
