pcANYWHERE³² Version 8.0

The #1 selling remote-control and file-transfer software. New Symantec pcANYWHERE³² makes it easy to connect to your office PC, whether you're at home or on the road. Now you can remotely control your office PC via modem or via the Internet. Quickly synchronize files between two computers. And do everything faster, with optimal 32-bit support for both Windows 95 and Windows NT.

Works on any PC. Run pcANYWHERE on all the platforms you use. One CD gives you pcANYWHERE³² for Windows 95 and Windows NT, plus versions of pcANYWHERE for Windows 3.1 and DOS. All the platforms communicate with each other.

The fastest performance anywhere. pcANYWHERE is loaded with features that help you stay productive and minimize connection charges.

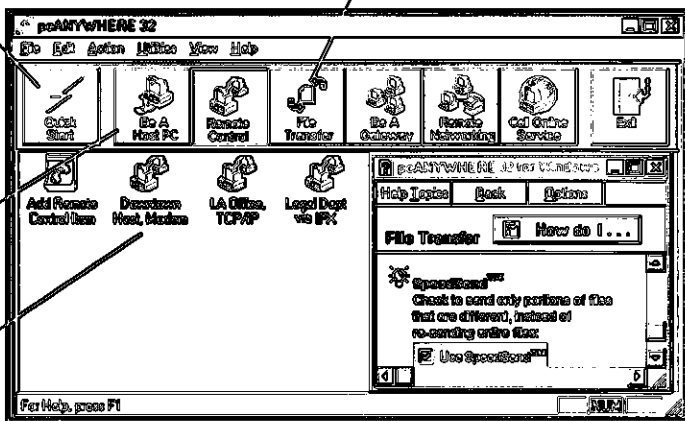

Easy setup. pcANYWHERE³² automatically knows what kind of computer and modem combination you're using—just plug and play. Then, when you're ready to connect to your office PC for the first time, wizards will walk you through everything step by step.

Get up and running quickly—
Quick Start wizards show
you how.

Simply drag and drop to transfer files between your
PC and the PC or network you're connected to.

Button bars let
you customize
the interface
to meet your
specific needs

Set up your
connection
options
once—then
access them
again at any
time with a
single click!

Powerful and complete online help answers all your
questions. Go ahead, leave the manual at home!

Easy connections. To remotely launch programs that live on your office PC, simply click the pcANYWHERE connection icon on your remote computer's desktop. pcANYWHERE will automatically establish a connection to your office PC and launch the application.

The #1 choice for MIS. Now MIS and help-desk professionals can support multiple users from anywhere, in ways never before possible. Look at a user's screen and make changes directly without even being there. Deliver training materials and deploy preconfigured software updates to many users at once. Plus, manage LANs, WANs, and even enterprisewide information systems with a single, consistent interface.
