

# Norton AntiVirus™ 4.0 for Windows NT® Servers

## AUTOMATIC VIRUS PROTECTION

As part of Symantec's commitment to protecting your enterprise computing environment, Norton AntiVirus™ now brings comprehensive, automatic virus protection to your Windows NT servers. With Norton AntiVirus, you can deploy a consistent solution across all your platforms that is based on the most advanced technology and backed by the industry's most extensive anti-virus research lab.

Norton AntiVirus for Windows NT Servers can be installed remotely and provides continuous, unobtrusive background protection. You're protected against the most common sources of viral infection. Plus, your Windows NT-based Web servers and FTP servers will be prevented from passing along viruses. With Norton's advanced technology and free scheduled LiveUpdate™ downloads, you're assured the most up-to-date protection against new and unknown viruses—including the fast-spreading macro viruses.

*Norton AntiVirus now brings comprehensive, automatic virus protection to your Windows NT servers.*

### **Easy installation**

Installs, configures, and updates remotely, dramatically reducing overhead and maintenance.

### **Flexible administration**

Supports flexible scanning policies, customizable scans, and automatic scheduling.

### **Centralized alerting**

Keeps you informed of virus activity anywhere in your organization with centralized alerting on your Windows NT platform.

### **Up-to-date virus definitions**

Keeps virus definitions current without interrupting work—for free—with automatic or scheduled updates via LiveUpdate software.

### **Superior macro virus protection**

Includes exclusive Bloodhound™ technology—heuristic technology so effective it detects more than 90 percent of all new and unknown macro viruses.

Designed for  
  
Microsoft®  
BackOffice™

**SYMANTEC.**™

# The most comprehensive virus protection for your Windows NT servers.

## KEY BENEFITS

### Easy, flexible administration

- Installs to both local and remote systems, saving you the trouble of constantly updating remote machines.
- Provides comprehensive centralized alerting on your Windows NT platform.
- Allows scheduled customized scans of local and remote servers.

### Comprehensive real-time protection

- Norton AutoProtect provides continuous, unobtrusive real-time protection, automatically scanning files when they are downloaded, opened, created, modified, or executed.
- Effectively eliminates viruses coming from the Internet, intranets, networked drives, floppy disks, hard drives, email attachments, CD-ROMs, even drives shared between peer machines.
- Prevents Windows NT-based Web and FTP servers from passing along viruses.

### Superior macro virus protection

- Exclusive Bloodhound™ technology provides the best protection available against new and unknown viruses, and the most effective protection against fast-spreading macro viruses.
- Scrutinizes a program's overall structure, programming logic, instructions, file data, and other attributes, and then uses heuristic logic to assess the likelihood of viral infection.
- Detects over 90 percent of all new and unknown macro viruses.

### Free virus definition updates

- Exclusive LiveUpdate™ provides free virus definition and software updates via scheduled downloads.
- Updates can be automatically installed on remote machines from a site within your organization without time-consuming uninstalls or registry updates.

### Protection you can count on

- Users of Norton AntiVirus products are backed by the Symantec AntiVirus Research Center (SARC™), a highly skilled team of virus experts. SARC works continuously to identify and neutralize viruses before they can endanger your systems and files. SARC is committed to providing a swift, global response to virus outbreaks, proactive research on future virus threats, and ongoing education. For more information, visit the SARC Web site at [www.symantec.com/avcenter](http://www.symantec.com/avcenter).
- Norton AntiVirus is the protection of choice for many Fortune 500 companies and for more than 15 million users worldwide.
