

# TEAC®

**DELIVERS  
6 DISC  
CONVENIENCE**

## SPECIFICATIONS

### 6 Disc Convenience

The CD-C68E is the only CD-ROM changer that's designed to hold six discs inside your PC at once. That's six disc convenience and 8X performance all in a standard, half height internal CD-ROM drive. Pre-load your favorite multimedia applications, reference titles and audio CDs for quick access and smooth operation.

### Experience 8X Performance

The TEAC CD Changer provides true 8X playback performance. You'll experience all of the advantages found in other TEAC CD-ROM drives from the moment you put it to use. It combines a 1,200KBps data transfer rate and a 190ms average access time, out-spinning other CD-ROM changers. And its quicker data searches and smoother playback performance will free up more of your system's processing power.

### Direct Disc Loading System

TEAC's unique direct loading mechanism saves you time and simplifies its use. No additional multi-disc cartridges, magazines or caddies are required. This provides faster setup when replacing a specific disc. Access your target disc by simply touching one of the six eject buttons. Then load it by just pushing the disc through the front of the drive's bezel.

### Plug and Play

The CD-C68E utilizes an IDE/ATAPI interface for quick installation and wide compatibility. It automatically recognizes and memorizes each disc type and its table of contents the instant you load a new title. In addition, it comes with application and utility software for both audio and multifunction CD playback, as well as a disc manager for maintaining an index of your most frequently used titles.

<b>Model:</b>	CD-C68E
