Installing Tech Data On-line 2.30 from the BBS

Files: TDODISK1.EXE   Size: 1,256,931
**   TDODISK2.EXE   Size: 793,428**

These are the installation files for TDOL version 2.30. Before distributing these instructions, verify that the customer is a valid user of TDOL.

1. Create 2 directories on your hard drive (**Disk1** and **Disk2**)

2. Call the BBS at 813-538-7090 (United States) or 905-795-2358 (Canada)..

3. At the *"Enter Language #"* prompt, type **1 (English)** or choose your preferred language and press <Enter>.

4. At the *"Do you want graphics (Enter)=NO?"* prompt, press **Y (Graphics)** or <Enter> for no graphics.

5. At the *"What is your First Name?"* prompt, type either: **TDOLBETA1, TDOLBETA2, TDOLBETA3,** or **TDOLBETA4**

6. At the *"What is your Last Name?"* prompt, press <Enter>.

7. At the *"Password"* prompt,. type: **TESTER** and press <Enter> through the *"Scan Message Base"* prompt.

8. At the *"TD Online (30) Conference Command"* prompt, type **D (Download).**

9. Download the file TDODISK1.EXE into the DISK1 directory created in step 1

10. If you are given a list of protocols, choose the correct one for your software. If not, choose option **T (Transfer Protocol)** and pick a protocol that your software can use from the list.

    ➲ Windows Terminal program uses XMODEM.CRC, Hyperterminal uses ZMODEM

11. Begin the download. When the download is finished, proceed to step 12.

12. Repeat steps 8 through 10 to download TDODISK2.EXE into the DISK2 directory created in step 1.

13. Type **G** (Goodbye) at the "TDOLBETA (30) Conference Command" prompt to exit the BBS.

14. Run **File Manager** (or Explorer).

15. Go to the directories **DISK1** or **DISK2** and run each executable (by double-clicking) them. The file will explode into a variety of individual files. Please delete the TDODISK1.EXE from the DISK1 directory and the TDODISK2.EXE from the directory DISK2

16. Copy all the files in DISK1 directory to a floppy diskette and label it Tech Data On-line Version 2.3 - Disk 1.

17. Copy all the files in DISK2 directory to a floppy diskette and label it Tech Data On-line Version 2.3 - Disk 2.

18. Go to Program Manager and choose *File: Run.*

19. Put **Disk 1** in your floppy drive.

20. Type **A:SETUP** (or **B:SETUP**, whichever is your floppy drive). This will install the program to your hard disk.

21. Run Tech Data On-line from Program Manager.
