

Domino Server Options

Domino 4.6 Server #879040 *For SMP Services add #887812*

Lotus Domino 4.6 is the only messaging and application server that provides a set of integrated services to build, deploy and maintain secure, interactive applications on the Internet and corporate intranets, and extranets. Because Domino supports all of the leading Internet standards and protocols, most Internet standards-based products can interoperate fully with Domino. Supported OS'es: OS/2 Warp, OS/2 SMP, NT, Netware, Win '95, AIX, Sparc, HP-UX.

Domino Intranet Starter Pack #879017 *For SMP Services add #887812*

This is a "superset" of Domino Server meaning that is Domino Server, plus 12 ready to customize business applications such as: Document Library, Employee Directory, Company Forms, Discussion Database, Project Management, Customer Tracking, Contact Management, Home Page, Website, Product Catalog, Career Opportunities and F.A.Q.

Domino 4.6 Mail Server #879038 *Upgrade to Domino 4.6 Server-#879077* *For SMP Services add #887812*

Domino Mail Server 4.6 allows a company to easily setup a secure email system, that can be accessed from a variety of clients including all of the Lotus clients, as well as any industry standard browser.

Notes Client Options

Any client connects to any server

Domino Designer #879036

This is the developers version of Notes, with all of the tools necessary to build and maintain secure and collaborative Net applications on the Domino Server.

Notes Desktop #879034

This should be positioned as the client of choice because of the following functionality:

- PORTFOLIOS: Group related applications together.
 - CONTACT MANAGEMENT.
 - ENTERPRISE CALENDARING & SCHEDULING. Set meetings with real-time lookups of colleagues' free and busy times.
 - SUPPORT FOR MOBILE USERS.
 - DIRECT INTERNET LINK. Jump onto the Web straight from Notes.
 - TWO-WAY REPLICATION. Work off-line and synchronize information between your office, laptop, home PC, or Pilot PDA.
 - ENHANCED INTEGRATION WITH MS OFFICE 95 & 97 - Allows you to take advantage of the desktop productivity apps you use every day.
- Use either Lotus WordPro or MS Word as your email editor.

Notes Mail Client #879032

This is a limited function version of the Notes Desktop product, and is designed for the user who is only interested in sending and receiving mail, and using the enterprise calendaring and scheduling feature. There is only about five dollars difference between the Mail and Desktop client.

Industry Standard Browsers such as Microsoft Internet Explorer, Netscape Navigator, etc. This scenario offers the least functionality.
