

# Sportster® 33.6 Faxmodem

for Macintosh® Computers

## The world's number one selling modems.

- Easy e-mail
- Friendly faxing
- Save time online

### *Mac™ easy, Sportster reliable.*

As a Macintosh user, you appreciate just how easy a Mac is to work with. Now there's a modem that's just as easy to use — the Sportster 33.6 Faxmodem for Macintosh, from U.S. Robotics.

Sportster 33.6 is the logical modem choice for Macintosh users. Sportster is both easy to set up and operate, and one of the most reliable modems ever made. (In fact, reliability is a key reason why Sportster is the top-selling modem brand in the world today.)

### **Fast now, faster in January.**

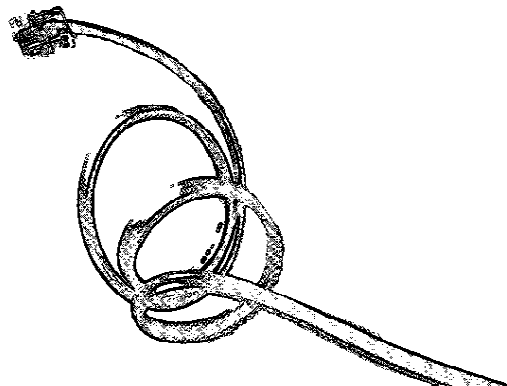

Better yet, the Sportster 33.6 is upgradable to the new 56 Kbps x2™ Technology from U.S. Robotics (available in January, 1997), which allows for download speeds nearly twice as fast as 28.8 Kbps modems over your regular phone line. America Online, CompuServe and MCI are just some of the major Internet service providers worldwide that have agreed to make x2™ Technology available to their subscribers. (Availability planned for February, 1997.)

As the first company to bring you 14.4 Kbps, 28.8 Kbps/V.34 and 33.6 Kbps technology, U.S. Robotics is the leader in bringing higher speed communications standards to modem users like you. That's why we've already submitted x2 to the ITU-T (the international standards organization) for review as the next worldwide standard in modem speed.

### **Quick, easy Internet access.**

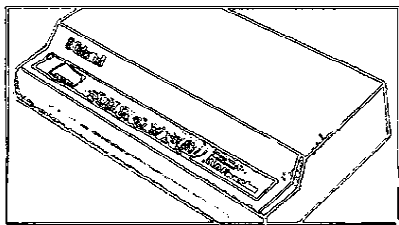

Special Macintosh cabling and software make Sportster 33.6 the ideal choice for quick and easy Internet access. And it comes with the U.S. Robotics *Connections™* CD-ROM software collection, which includes all the software you need to explore the Internet, access online services, and send and receive e-mail and faxes.

If you're looking for a modem for your Macintosh, check out the Sportster 33.6. Simply put, it's the best there is.

Mac™ easy, Sportster reliable.

- Easy e mail
- Friendly faxing
- Save time online

## Features

### Speed and Compatibility

The faster you transmit, the more time and money you save on phone and online service charges. Compliance with international standards means you can connect with other modems, computers and fax machines all over the world.

- 28.8 Kbps V.34 and 33.6 Kbps (Upgradable in January, 1997 to 56 Kbps x2™ Technology)
- 14.4 Kbps V.32 bis
- Backward compatible with ITU-T and Bell standards down to 300 bps

### Error Control and Data Compression

- V.42/MNP 2-4 error control
- V.42 bis/MNP 5 data compression

### Fax Features

What you see is what they receive — computer-generated faxes come through without the distortion caused by standalone fax machines.

- Class 1 and 2.0 Group III 14.4 Kbps fax
- Delayed and group sending
- Fax forwarding
- Immediate notification of incoming and outgoing faxes
- Background send and receive

### Package Contents

- Sportster 33.6 faxmodem for Macintosh computers (1.5" high x 6.5" wide x 3.75" deep)
- U.S. Robotics *Connections*™ CD ROM software collection including:
  - MacComCenter fax/communications software
  - Internet and online service software
  - Multimedia demonstrations, trial offers and special values
- U.S. Robotics product and support information
- User manual
- Power adapter (UL approved)
- 7-foot telephone cord
- High speed Mac-to-modem cable

### Warranty

5 years limited warranty on parts and labor; factory repair or replacement

### Regulatory Approvals

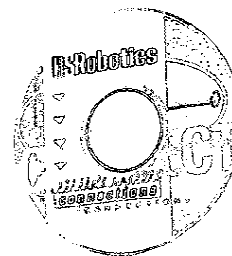

- FCC approved (Part 15 Class B/Part 68)
- IC (formerly DOC) approved
- UL listed
- CSA approved
