

ConferenceLink™ CS1055

Speakerphone

Talk and listen at the same time!

Full duplex audio means no clipped words
or one-way conversations

360° coverage picks up all voices in the room

Ideal for medium to large conference rooms

Plugs into your PC's full duplex sound card for high-quality
audio during videoconferencing and Internet voice calls

Professional full duplex speakerphone

Using a typical office speakerphone for teleconferencing can mean costly missed words and frustrating conversations. Now, with the CS1055 full duplex speakerphone, you experience professional and productive communication between co workers, customers, or associates, and save the time and expense of traveling to a meeting. No more missed words, clipped sentences, or one-way conversations. The CS1055 is designed for individuals or groups of up to 10 people. Optional extension microphones extend room coverage on either side of the base for larger groups or longer tables.

360° Coverage

Three powerful built in microphones provide 360° coverage during conference calls. With automatic gain control, everyone in the room will be heard whether they're sitting, standing, or moving around the room.

Plugs into your PC's sound card

The CS1055 handles more than just regular conference calls. It also can turn your PC into a productive audio communications tool. Just plug the CS1055 into your PC's full duplex sound card to provide high-quality audio during videoconferencing and Internet voice calls.

ConferenceLink™ CS1055

Speakerphone
